

STATISTICAL NEWS

Release No: 20, 2019

20th March, 2019

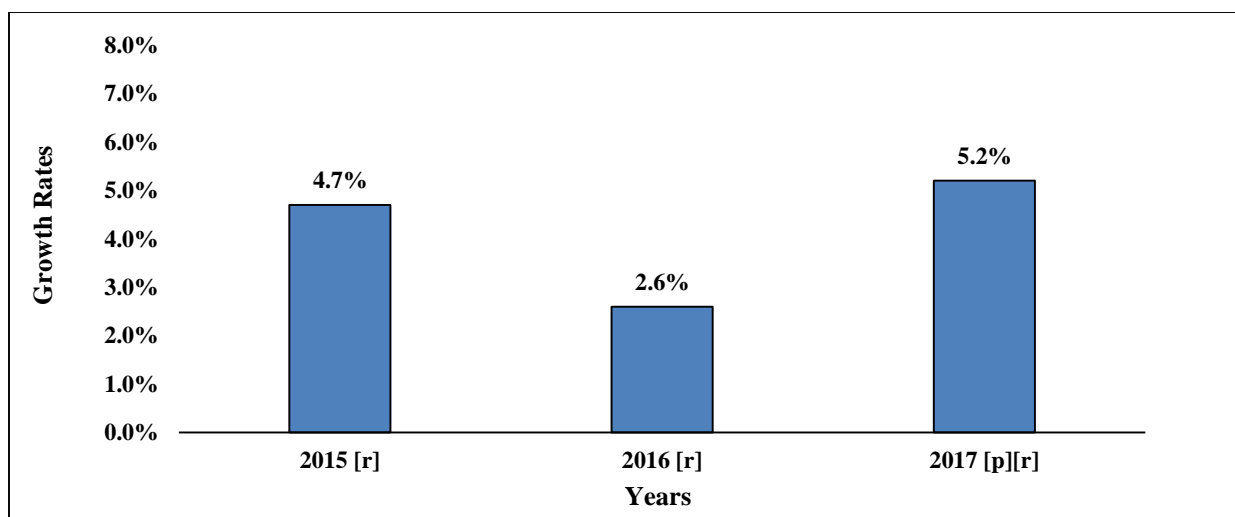

FIJI'S GROSS DOMESTIC PRODUCT (GDP) Rebased to 2014

The Fiji Bureau of Statistics has completed the rebasing of the Gross Domestic Product (GDP) series to the year 2014. Data gathered from various sources was used to measure various economic activities in the economy from 2014 to 2017. The Real GDP will now be based on the structure of the economy in 2014.

NEW BASE

The compilation procedures are in accordance with the United Nations System of National Accounts 2008 (2008 SNA). The economic activities are classified according to the Fiji Standard Industrial Classification [FSIC] 2010 which is based on the International Standard Industrial Classification Revision 4. Data for the compilation work was sourced from administrative records, surveys and special studies conducted by the Fiji Bureau of Statistics.

Graph 1: Real GDP Growth Rates 2015 - 2017

Fiji's economy grew by 4.7 percent in real terms in 2015, 2.6 percent in 2016 and 5.2 percent in 2017. The provisional estimates under the 2011 base as released on the 5th September, 2018 is being revised upwards due to the change in the base year to 2014. In addition, the inclusion of deflated net taxes in GDP, new economic data and an improvement of applied compilation methods such as the double deflation across industries which was not undertaken in the 2011 base.

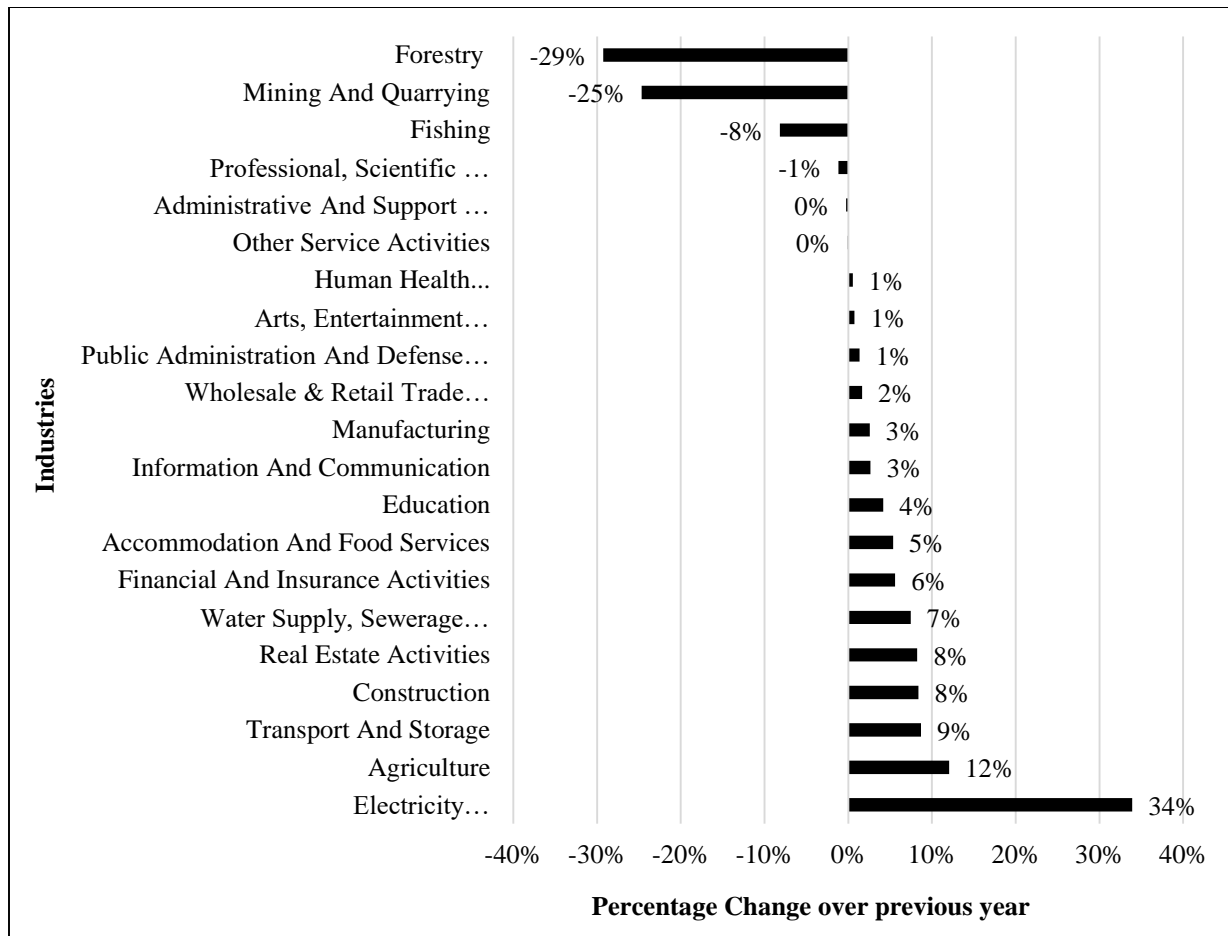

Table 1: Contribution to Real GDP Growth

		2015	2016	2017 [p]
Real GDP		4.7	2.6	5.2
Net Taxes		1.6	2.2	2.0
Gross Value Added		3.1	0.5	3.2
A	Agriculture, Forestry And Fishing	0.2	-0.9	0.6
B	Mining And Quarrying	0.1	0.1	-0.2
C	Manufacturing	0.6	0.7	0.3
D	Electricity	0.2	0.2	0.4
E	Water Supply And Sewerage	0.0	0.0	0.0
F	Construction	0.1	0.2	0.2
G	Wholesale And Retail	0.3	0.8	0.2
H	Transport And Storage	-0.3	-0.5	0.4
I	Accommodation And Food Service Activities	0.3	-0.5	0.2
J	Information And Communication	0.4	0.4	0.1
K	Financial And Insurance Activities	0.1	-0.2	0.4
L	Real Estate Activities	0.1	-0.3	0.2
M	Professional, Scientific And Technical Activities	0.0	0.1	0.0
N	Administrative And Support Service Activities	0.1	-0.1	0.0
O	Public Administration And Defence	0.6	0.2	0.1
P	Education	0.2	0.3	0.3
Q	Human Health And Social Activities	0.0	0.0	0.0
R	Arts, Entertainment And Recreation	0.0	0.0	0.0
S	Other Service Activities	0.0	0.0	0.0

Note: Any discrepancy in totals and sum of components are due to rounding.

p = provisional

Graph 2: 2017 Provisional Real Gross Value Added Growth Rates by Industry

- The Electricity industry strongly grew in 2017 in real terms due to a lower real intermediate cost compared to the previous year.
- Higher real growth in yaqona, sugarcane and taro led to the 12 percent increase in the Agriculture industry.
- Transport & Storage increased by 9 percent driven by higher air transport services and service activities incidental to air and water.
- Higher real value added for owner occupied dwellings improved the real estate industry.
- Water supply and sewerage recorded 7 percent growth in 2017 led by an increase in water production.
- Growth in Financial and Insurance industry was led by commercial banks and life insurance.
- Accommodation and food services grew by 5 percent driven by increase in room nights sold in the accommodation industry.

The following industries recorded moderate growth in 2017:

- Education
- Information and Communication
- Manufacturing
- Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles
- Public Administration and Defence; Compulsory Social Security
- Arts, Entertainment and Recreation
- Human Health and Social Work Activities
- Other Service Activities
- Administrative and Support Service Activities

Forestry, Mining & Quarrying, Fishing and Professional services recorded decline in real value added in 2017.

- Lower productions were recorded for Native, Mahogany and Sandalwood leading to a decline in the forestry real value added.
- Mining & Quarrying declined as a result of lower gold production and quarrying activities.
- The negative growth in fishing was driven by declines in the offshore fishing and beach-de-mer.

Changes in Growth Rates

The GDP estimates and growth rates for 2015, 2016 and 2017 released earlier by the Fiji Bureau of Statistics under the 2011 base is being revised due to the following:

- The change in the Base year from 2011 to 2014.
- The compilation of 2014 Supply and Use Table.
- Availability of more recent and detailed annual business surveys.
- Improved compilation methodologies.
- Availability of new and suitable indicators and deflators.
- Newly rebased indicators/deflators for the estimation of Real Value Added by industries:
 - The Consumer Price Index [CPI] with 2014 as its base.
 - The Building Material Price Index [BMPI] with 2014 as its base.
 - The Industrial Production Index [IPI] with 2014 as its base.
 - Data from Household, Income and Expenditure Survey 2013/2014

Please find attached the following Appendices for your reference:

- Appendix 1:** Nominal GDP by Industry;
- Appendix 2:** Real GDP by Industry;
- Appendix 3:** Contribution to Real GDP;
- Appendix 4:** Real GDP by Market and Non-Market;
- Appendix 5:** Real GDP by Formal and Informal;
- Appendix 6:** Gross Output & Intermediate Cost in current prices;
- Appendix 7:** Gross Output & Intermediate Cost in constant prices; and
- Appendix 8:** Technical Notes.

The detailed file on GDP can be downloaded from the Fiji Bureau of Statistics website under the National Accounts section.

The following contact persons are available to attend to any further enquiries:

- 1) Mr. Bimlesh Krishna – Chief Statistician – Economics on bkrishna@statsfiji.gov.fj or on Telephone 3315822 ext: 386 233.
- 2) Mr. Alifereti Tawake – Statistician – National Accounts on atawake@statsfiji.gov.fj or on Telephone 3315822 ext: 386 237.

Mr. Kemueli Naiqama
Deputy Government Statistician

Appendix 8: TECHNICAL NOTES¹

Gross Domestic Product (GDP) - the total value of goods produced and services provided in a country during a particular year. The GDP is measured in current and constant prices.

Nominal GDP - measures the value-added production in current prices. Increases in current price GDP can be driven simply by price changes without any change to the quantity. For this reason GDP series are often expressed in constant price.

Real GDP - measures value-added production expressed in the prices of a particular year, known as the base period.

Gross value added (GVA) - is a measure of the value of goods and services produced in an area, industry or sector of an economy. In national accounts GVA is output minus intermediate consumption.

Market output is the normal situation in a market economy where producers make decisions about what to produce and how much to produce in response to expected levels of demand and expected costs of supply. The determining factor behind production decisions is that economically significant prices prevail in the market.

Non-market output is output undertaken by general government and NPISHs that takes place in the absence of economically significant prices. A price is said to be not economically significant when it has little or no influence on how much the producer is prepared to supply and is expected to have only a marginal influence on the quantities demanded.

The Informal sector comprises unincorporated enterprises owned by households. These enterprises produce at least some products for the market, work themselves or employ family workers with or without pay and/or paid casual workers and/or are not registered under Fiji's legislation e.g. to tax or social security obligations, or regulatory acts.

¹ The definitions have been sourced from the 2008 System of National Accounts Manual.
