PREFACE

The Fiji Standard Industrial Classification (FSIC) 2010 is a national classification that is used for classifying data according to kind of economic activity in the fields of economic and social statistics, such as for statistics on national accounts, demography of enterprises, employment and others.

FSIC 2010 has been derived from the International Standard Industrial Classification (ISIC) Rev. 4. Necessary modifications to meet national requirements have been made. This has been done without disturbing the framework of the ISIC Rev. 4 so that international comparisons can be made. The FSIC 2010 replaces the FSIC 2004 which was based on ISIC Rev. 3.

The structure of FSIC 2010 is more detailed than the structure of FSIC 2004 since new industries, especially in the case of services have been identified separately. Relevance of the classification has also been enhanced with the introduction of new high-level categories to better reflect the current economic phenomena e.g. one such innovation is a new section titled “Information and communication.

This publication consists of three parts. Part I provides important information for those intending to use the FSIC 2010. Part II, Chapter 1 contains the structure at one- and two-digit levels. Breakdown at these aggregated levels is important because of its use in national accounts, employment and demographic statistics. Chapter 2 contains the detailed classification. Part III contains the detailed corresponding tables between FSIC 2010 and FSIC 2004.

The Economic Statistics Division of the Fiji Islands Bureau of Statistics put in a lot of hard work in producing the FSIC 2010.

In February 2010 the Division came up with the draft classification.

The classification was then put to test from February to July 2010 on the 2008 economy wide business surveys. This enabled the Division to assess business activities carried out in Fiji, in light of which the classification was reviewed.

I am grateful to all those who helped in any way.

1 INTRODUCTION

1.1 Historical background

Up until 1982 a modified version of the United Nation's ISIC, also known locally as the ISIC, was used.

In 1983 the Fiji Islands Bureau of Statistics released the first local classification in its true sense. This was called the Fiji Standard Industrial Classification (FSIC) Rev. 2 and was based on the United Nation's ISIC Rev. 2.

In December 2004 the Fiji Islands Bureau of Statistics released the FSIC 2004 which was based on the United Nation's ISIC Rev. 3.1.

1.2 Need for revision

Experience in the use of FSIC reveals the need for a periodic review of the structure and definition of its categories and underlying principals since changes take place in the organisation of economic activities in Fiji. It also reveals aspects that should be amplified, clarified or improved in other ways whilst maintaining as much comparability between the revised and the preceding version.

1.3 FSIC 2010

The scope of FSIC 2010 extends to economic activities within the production boundary of the System of National Accounts (SNA) 2008 with the exception of undifferentiated services- and goods-producing activities of private households for own use. This activity is captured through household surveys for measuring subsistence.

These economic activities are subdivided in a hierarchical, five-level structure of mutually exclusive categories, facilitating data collection, presentation and analysis at detailed levels of the economy in an internationally comparable, standardized way. The categories at the highest level are called sections, which are alphabetically coded categories intended to facilitate economic analysis. The sections subdivide the entire spectrum of productive activities into broad groupings, such as "Agriculture, forestry and fishing" (section A), "Manufacturing" (section C) and "Information and communication" (section J). The classification is then organized into successively more detailed categories, which are numerically coded: two-digit divisions; three-digit groups; four-digit classes and, at the greatest level of detail, five-digit sub-classes.

The classification classifies statistical units, such as establishments or enterprises, according to the economic activity they mainly engage in. The set of statistical units classified into the same FSIC category is then referred to as an industry, such as the

“construction industry”, which would refer to all units classified in FSIC section F (Construction).

2. THE UNDERLYING PRINCIPALS OF THE FSIC 2010

A Purpose and nature of FSIC 2010

1 General considerations

In the study of economic phenomena relevant kinds of different elements are taken into account. Distinction and coherence between the elements are put into shape by logical ordering so that information about these phenomena can be made use of. Thus, all economic processes that are to be described in the form of statistics require systematic classification. Classifications are the system of languages used in communication about, and statistical processing of, the phenomena concerned. They divide the universe of statistical data into categories as homogenous as possible. As such the FSIC 2010 is intended to be a standard classification of productive economic activities.

2 Differences from other classifications

FSIC 2010 is a classification according to **kind of economic activity**, and not a classification according to the type of commodity produced¹ except where a specific commodity contributes significantly to the economy of Fiji e.g. sugarcane.

The kind of economic activity carried out by a statistical unit is the type of production in which it engages. It is the characteristic of the unit according to which it will be grouped with other units for certain statistics, e.g. construction statistics.

FSIC 2010 does not draw distinctions according to kind of ownership, type of legal organisation or mode of operation, because such criteria do not relate to the characteristics of the activity itself.

B Principal, secondary and ancillary activities

An industry is defined as the set of all production units engaged primarily in the same or similar kinds of productive economic activity. In practice however the output of an industry, no matter how narrowly defined, will tend to consist of primary and secondary products because entities comprising the industry will not only engage in principal activity but also secondary and ancillary activities.

The principal activity is the activity that contributes most to the value added of the entity, or the activity the value added of which exceeds that of any other activity of the entity.

¹ For classification by type of commodity a separate classification was developed by the United Nations: the Central Product Classification. The Fiji Islands Bureau of Statistics does not do a commodity classification but accounts for major commodities in the economic activity classification.

A secondary activity is each separate activity that produces products eventually for third parties and that is not a principal activity of the entity in question. Most economic entities produce at least some secondary products.

Principal and secondary activities cannot be carried out without the support of a number of ancillary activities, such as bookkeeping, transportation, storage, sales promotion, repair and maintenance, security etc.

There are a number of characteristics of ancillary activities that can generally be observed in practice, which help to identify them as ancillary. Ancillary activities are usually fairly small-scale compared with the principal activity they support and the output is always intended for intermediate consumption within the same entity and therefore it is not recorded separately. When ancillary activities carried out centrally for the benefit of two or more principal activities, the cost of these ancillary activities must be allocated over all activities they serve. If information is not available, the cost of the ancillary activity may be distributed simply in proportion to the value of the output.

However, if the establishment undertaking ancillary activities is statistically observable i.e. if separate accounts for the production it undertakes are readily available or if it is in a geographically different location from the establishments it serves, then it may be desirable and useful to consider it as a separate unit and allocate it to the industrial classification corresponding to its principal activity.

The following activities are not to be considered ancillary:

- Producing goods or services as part of fixed capital formation. The type of units most affected are those doing construction work on the account of their parent unit. This approach is in accordance with the classification in FSIC of own-account construction units for which data are available to the construction industry;
- Producing output which, although also used as intermediate consumption by the principal or secondary activity, is for the greater part sold on the market;
- Producing goods that become a physical part of the output of the principal or secondary activity (for example, the production of boxes, tin cans or the like by a department of an enterprise as packaging for its own products);
- Research and development activities, which are considered part of fixed capital formation in the context of SNA.

C Principal used in constructing the classification

1 Criteria in respect of divisions and groups

The main criteria employed in delineating divisions and groups were

- The character of the goods and services produced
- The uses to which goods and services are put, and

- The inputs, the process and the technology of production.

2 Criteria in respect of the classes/sub-classes

The criteria used were to ensure that units falling into each class/sub-class were similar in the kinds of activity in which they engaged.

D Statistical units

1 General remarks

Economic activities are performed by entities that have a legal² and operational structure of their own. Most of these entities have complete sets of accounting and administrative records available which statisticians, from the point of view of data collection take advantage of. Where legal and operational structures and record keeping practices are not developed, guidelines are prepared for statistical units to be used so that comparable national and international statistics can be produced. For example, if two or more statistical collections cover the same industrial sector, comparisons between data cannot be made unless the object of comparison applies to the same units. The statistical unit serves as a tool to measure in an unduplicated and yet exhaustive fashion several aspects of the economy. In terms of the gross domestic product particularly, large and complex entities contribute a significant share. These entities may engage in different activities at different places. Using such entities as a whole would give results that are very heterogeneous, so therefore these entities need to be partitioned into smaller units for the sake of more homogenous statistics. The bridge between the organisational structure of economic entities and the statistical units are built and kept up-to-date by a Business Register. These units then serve as a frame for samples for the data requests sent to the units. The register also serves as a source for demographics of enterprises: provides information of births and deaths of enterprises, merges and split-ups, changes to ownership of activity etc.

2 Different statistical units

The systematic description of the economy as represented by the SNA 2008, analyses two interrelated types of transactors and transactions that require two levels of statistical units:

- Establishment is used for the analysis of transactions in goods and services and for the compilation of the production account.
- Enterprise is used as the statistical unit for the compilation of the income accounts, accumulation accounts and the balance sheet accounts, as well as, in the institutional sector classification of economic entities.

² Legal entities are entities whose existence is recognised by law independently of the persons or institutions that may own them.

Enterprise can be referred to as an institutional unit engaged in one or more productive activities with autonomy in financial and investment decision-making, as well as, authority and responsibility for allocating resources for the production of goods and services. An enterprise may be a corporation or a quasi-corporation, a non-profit institution or an unincorporated enterprise. Corporate enterprises and non-profit institutions are complete institutional units, whilst unincorporated enterprise is an institutional unit—a household or government unit— only in its capacity as a producer of goods and services. The enterprise is the level of statistical unit at which all information relating to its transactions, including financial and balance-sheet accounts, are maintained, and from which international transactions, an international investment position (when applicable), consolidated financial position and net worth can be derived.

Establishment can be referred to as an enterprise or part of an enterprise that is situated in a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added.

Other statistical units:

The concept of the establishment is to compile data that is classified both by activity and by geographical region. Where precision in either the geographic or the activity dimension is not required, other units that may be used as statistical units for the compilation of production or production-related statistics:

Kind of activity unit can be referred to as an enterprise that engages in one kind of economic activity without being restricted to the geographic area in which that activity is carried out.

Local unit can be referred to cover all economic activities carried out by an enterprise at or from one location.

When the criterion of kind-of-activity unit and the local unit are combined, the resulting concept corresponds to the operational definition of the establishment.

Homogenous unit of production can be referred to as a production unit in which only a single (non-ancillary) productive activity is carried out. Units of homogeneous production are optimal for a particular type of analysis e.g. input-output analysis and are independent of the location of the activity. If it is desired to compile production accounts and input-output transaction tables by region, it is necessary to treat units of homogeneous production located in different places as separate units even though they may be engaged in the same activity and belong to the same institutional unit.

The following diagram shows the concept of the statistical units and their mutual relationship:

	One or more locations	Only one location
One or more activities	Enterprise	Local unit
Only one activity	Kind-of-activity unit	Establishment and Homogenous unit of production

3 Classification of statistical units

The principal activity of the unit determines the activity classification of that unit. Secondary and ancillary activities are to be disregarded when classifying a unit. Ideally the principal activity of the unit should be determined by reference to the value added of the goods sold or services rendered. In practice it is often impossible to obtain the information on value added of the different activities performed and the activity classification has to be determined by using substitute criteria, such as:

- Substitutes based on output, such as:
 - The gross output of the unit that is attributable to the goods or services associated with each activity;
 - The value of sales or shipments of those groups of products falling into each category of activity;
- Substitutes based on input, such as:
 - Wages and salaries attributable to the different activities;
 - Hours worked attributable to the different activities;
 - Employment according to the proportion of people engaged in the different activities of the unit.

Substitute method should be used with caution since there are problems associated with both the methods e.g. for the output substitutes turnover and value added may not be proportional and for the input substitute the proportionality between wages and salaries or employment and value added is not reliable if the capital intensity of the various activities is different. Higher capital intensity normally implies higher depreciation and a lower share of wages and salaries in the gross value added.

3.1 Treatment of mixed activities

When considerable proportions of the activities of a unit are included in more than one sub-class of FSIC 2010 as a consequence of vertical

integration (for example, tree felling combined with sawmilling); horizontal integration (for example, the manufacture of hides and skins in slaughterhouses); or any combination of activities that cannot be separated at the level of the statistical unit, the rules set out below should be applied.

- **Treatment of independent multiple activities**
If a unit is engaged in several types of independent activities but cannot be segregated into separate statistical units (when, for example, manufacture of bakery products is combined with manufacture of chocolate confectionery), the unit should be classified according to the activity that contributes most to the value added of the unit i.e. 50 per cent of the value added.
- **Treatment of vertical integration**
Vertical integration of activities occurs when the different stages of production are carried out in succession by the same unit and the output of one process serves as input to the next e.g. tree felling and subsequent on-site sawmilling. If value added or substitutes for the different stages in the chain of production activities in a vertically integrated process cannot be determined, then comparisons with other units (e.g., based on market prices for intermediate and final products) could be used. The same precautions for using substitutes as listed above apply here.
- **Treatment of horizontal integration**
Horizontal integration occurs when activities are carried out simultaneously using the same factors of production, in which case it is not possible to separate activities into different processes, assign them to different units or provide separate data for them, nor would rules relying on allocation of value added or similar measures be applicable. Alternative indicators, such as gross output, might sometimes be applicable, but there is no general rule for identifying the single activity that best represents the mix included, as such in many cases commonly integrated activities are included in the same sub-class of FSIC 2010 even though their outputs have quite different characters e.g. the production of crude glycerol is classified with the manufacture of soap and detergents, cleaning and polishing preparations, perfumes and toilet preparations, whilst if synthetic glycerol had been produced in Fiji, it would have been classified with manufacture of basic chemicals. Crude glycerol is a by-product of soap manufacturing and therefore the production process of crude glycerol cannot be separated from the production process of soap; as a result, both productive activities have to be classified in the same FSIC 2010 sub-class, even though their physical output is quite different. On the other hand, the production of synthetic glycerol is a chemical process quite distinct from the production of crude glycerol and these

two activities are classified separately even though their physical output is quite similar.

- The “top-down” method
The top-down method follows a hierarchical principle: the classification of a unit at the lowest level of the classification must be consistent with the classification of the unit at the higher levels. To satisfy this condition the process starts with the identification of the relevant category at the highest level and progresses down through the levels of the classification in the following way:
Step 1 : Identify the section that has the highest share of the value added.
Step 2: Within this section, identify the division that has the highest share of the value added.
Step 3: Within this division, identify the group that has the highest share of the valued added .
Step 4: Within this group, identify the class that has the highest share of the valued added .share of value added.
Step 5: Within this class, identify the sub-class that has the highest share of the valued added .

3.2 E-commerce

Gaining popularity in Fiji is the sale of goods and services through the Internet or by other electronic means. The transfer of the ownership of a good or service in e-commerce involves three stages:

- the placement of the order,
- the payment and
- the delivery of the good or service.

E-commerce transactions may include situations where only the first stage, only the first and second stages, or all three stages are conducted through the Internet or by other electronic means.

Production units engaged in e-commerce should be classified to the industry of their principal activity. Such units therefore can be found in any industry of FSIC 2010. There is one notable exception to this rule: in retail trade, units that undertake their sales exclusively or predominantly through the Internet are classified within FSIC 2010 sub-class 47901.

3.3 Repair and maintenance

FSIC 2010 now provides separate categories for the repair of all kinds of goods, however no single high-level category exists that would cover all repair activities. Based on the type of good repaired, the activities are classified as follows:

- Repair of motor vehicles and of motorcycles are classified in sub-classes 45201 and 45401, respectively.
- Repair of computers and communication equipment is classified in group 951.
- Repair of personal and household goods is classified in group 952.
- Repair of other machinery and equipment is classified in group 331.
- Repair of buildings and other structures is classified in division 43.

3.4 Outsourcing/ activities on a fee or contract basis

Some units sell goods or services under their own name but the actual production is carried out fully or in part by others through specific contractual arrangements:

- *Principal* is a unit that enters into a contractual relationship with another unit to carry out some part (or all) of the production process;
- *Contractor* is a unit that carries out a specific production process based on a contractual relationship with a principal. The activities performed by the contractor are denominated “*on a fee or contract basis*”.
- *Outsourcing* is a contractual arrangement according to which the principal requires the contractor to carry out a specific production process.

Contractors are usually classified in the same FSIC 2010 category as units producing the same goods or services for their own account. Exceptions to this rule exist for trade activities, for which separate categories for such outsourced activities exist.

Principals are classified thus:

- *Outsourcing of parts of the production process*
If only part of the production process is outsourced, the principal is classified to the sub-class that corresponds to the activity representing the complete production process, i.e., it is classified as if it were carrying out the complete process, including the contracted work, itself. This applies not only to the outsourcing of support functions in the production process, such as accounting or computing activities, but also to the outsourcing of parts of the core production process, such as parts of a manufacturing process.
- *Outsourcing of the complete production process*
In general, if the principal outsources the complete production process of a good or service, it is classified as if it were carrying out the production process itself. This applies in particular to all service-producing activities, including construction. In the case of manufacturing, however, the following special considerations apply:

- In manufacturing, the principal provides the contractor with the technical specifications of the manufacturing activity to be carried out on the input materials. The input materials (raw materials or intermediate goods) can either be provided (owned) by the principal or not. A principal who completely outsources the transformation process should be classified into manufacturing if and only if it owns the input materials to the production process—and therefore owns the final output. A principal who completely outsources the transformation process but does not own the input materials is in fact buying the completed good from the contractor with the intention to re-sell it. Such an activity is classified in section G (Wholesale and retail trade), specifically according to the type of sale and the specific type of good sold.

3.5 Government activities

Activities carried out by government units that are specifically attributable to other areas of FSIC 2010 should be classified in the appropriate sub-class of FSIC 2010 and not in division 84 i.e. Public administration and defence; compulsory social security e.g. public hospitals will be classified in sub-class 86101.

3.6 Classification of enterprises

When activities of an enterprise cover a large variety of FSIC sub-classes, it may be appropriate for certain statistics to classify them at the division level only. When such a unit is to be classified at a lower level of the classification, the top-down approach using the value added should be used.

3.7 Classification of households

FSIC includes a category for the classification of households when they are employers of domestic personnel e.g. maids, gardeners, cooks etc. Data on these units are collected for various statistics using sample frames with households as collection units rather than businesses as collection units.

The application of rules for identifying the correct FSIC 2010 code for market activities is difficult to use for goods and services produced for own use since they might combine a mix of activities undertaken by household enterprises, such as agricultural activities, construction, textile manufacturing, repair and other service activities. Value-added ratios too cannot be used for identifying a principal activity. To provide a place for these mixed activities in the classification, two groups in division 98

(Undifferentiated goods- and services-producing activities of private households for own use) have been designated. This division will not normally be relevant to business statistics but rather applies to data collections covering household and subsistence activities.

4 Changing the activity code of the statistical unit

It often happens that units change their primary industrial activity either at once or gradually over a period of time. In such cases the change has to be reflected in the statistics, and thus in the activity codes assigned to these units. It is recommended that such changes be made at a time a major survey is carried out, e.g. an annual census: this is in order that short-term statistics do not become incomparable with longer-term statistics.

5 Capturing information about the activity of units and coding it according to FSIC 2010

The quality and comparability of statistics produced using FSIC 2010 will depend largely on the correctness of the codes assigned to the statistical units. In turn, the correctness of the codes will depend on the information available for determining them and the tools and procedures used. To some extent, the quality of the information will depend upon the type of statistical source:

Statistical offices will frequently need to collect directly from the units the information needed to determine the activity codes of the units, even when the business register used as the basis for their surveys is derived from, or developed in cooperation with, one or more of the administrative agencies.

Given the nature of FSIC 2010, the information that is needed to code for the register as well as the surveys will have to describe the main inputs, processes and outputs of the units' productive activities. For units with a wide range of products, information about them will also be necessary to determine their contributions to the value added or other relevant factors by which to determine their main activity.

E Structure and coding system of the FSIC 2010

1. Overall structure

In comparison with FSIC 2004, the general structure of FSIC 2010 has not changed. However, more detail has been introduced at all levels.

The name given to the categories at the different levels are:

- One-digit level is known as the Section and totals 21 as opposed to 17 in FSIC 2004,

- Two-digit level is known as the division and totals 83 as opposed to 57 in FSIC 2004,
- Three-digit level is known as the group and totals 186 as opposed to 128 in FSIC 2004,
- Four-digit level is known as the class and totals 299 as opposed to 229 in FSIC 2004, and
- Five-digit level is known as the sub-class and totals 349 as opposed to 306 in FSIC 2004.

2. Coding System

The need to reflect the structure of an economy in a modern way, as well as give due consideration to the importance of some service industries in terms of their contribution to the gross domestic product, the use of letters at the one-digit level, as was in FSIC 2004, is maintained. This is done to make the classification responsive to the tabulation needs of certain users. The use of letters also singles out broad classification categories in contrast to the coding itself, which has remained numerical at the two-, three-, four- and five-digit levels.

3. APPLICATION OF THE FSIC 2010

A General remarks

FSIC 2010 reflects the structure of production, i.e. the way in which economic activities are combined in, and distributed among, producing units in Fiji. It provides a framework for the international comparison of national statistics since it has adopted the same general principles and definitions of the ISIC Rev. 4.

B Use of ISIC Rev. 4 in establishing FSIC 2010

- FSIC 2010 is based on ISIC Rev. 4.
- There are instances when categories are either expanded or contracted, depending on the economic situation in Fiji. If a particular economic sector is especially well developed, or economically of great importance, the relevant classification is expanded. If some other sector of the economy does not exist or is still undeveloped or unimportant in the economy as a whole, the relevant part of the classification has been contracted.
- FSIC 2010 can be easily converted to ISIC Rev. 4 since the categories at the most detailed level of FSIC 2010, i.e. 5-digit level known as sub-class, are subdivisions of the most detailed level of ISIC Rev. 4, i.e. 4-digit level known as class.

C Use of different levels of the classification

It may be desirable to utilise less detailed classifications according to kind of economic activity for some type of statistics than in the case of some other series. For example, it may not be necessary to classify data according to kind of economic activity in as great detail in national accounting as in industrial statistics. By providing for varied levels of classification like tabulation categories, divisions, groups, classes and sub-classes, FSIC 2010 furnishes a framework for comparable classifications of data at different levels of detail.

4. CONCORDANCE

Part III gives the co-relation between the FSIC 2010 and FSIC 2004 at the most detailed level.

Chapter 2: DETAILED CLASSIFICATION

SECTION A: AGRICULTURE, FORESTRY AND FISHING

This section includes the exploitation of vegetal and animal natural resources, comprising the activities of growing of crops, raising and breeding of animals, harvesting of timber and other plants, animals or animal products from a farm or their natural habitats.

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
01				<p>CROP AND ANIMAL PRODUCTION, HUNTING AND RELATED SERVICE ACTIVITIES</p> <p>This division includes two basic activities, namely the production of crop products and production of animal products, covering also the forms of organic agriculture, the growing of genetically modified crops and the raising of genetically modified animals. It also includes service activities incidental to agriculture, as well as hunting, trapping and related activities.</p> <p>Group 015 (Mixed farming) breaks with the usual principles for identifying main activity. It accepts that many agricultural holdings have reasonably balanced crop and animal production and that it would be arbitrary to classify them in one category or the other.</p> <p>Agricultural activities exclude any subsequent processing of the agricultural products (classified under division 10 for manufacture of food products; 11 for manufacture of beverages and 12 for manufacture of tobacco products), beyond that needed to prepare them for the primary markets. However, the preparation of products for the primary markets e.g. drying of tobacco leaves is included here.</p> <p>The division excludes field construction (e.g. agricultural land terracing, drainage, preparing rice paddies etc.) classified in section F (Construction) and buyers and cooperative associations engaged in the marketing of farm products classified in section G.</p>
	011			<p>Growing of non-perennial crops</p> <p>This group includes the growing of non-perennial crops, i.e. plants that do not last for more than two growing seasons. Included is the growing of these plants for the purpose of seed production.</p>
		0111	01111	<p>Growing of cereals (except rice) leguminous crops and oil seeds</p> <p>This sub-class includes all forms of growing of cereals e.g. maize grains, leguminous crops e.g. beans and lentils and oil seeds e.g. groundnuts in open fields, including those considered</p>

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				<p>organic farming and the growing of genetically modified crops. The growing of these crops is often combined within agricultural units.</p> <p>This sub-class excludes: -growing of maize for fodder, see 01191 -growing of edible nuts, see 01251</p>
		0112	01121	<p>Growing of rice</p> <p>This sub-class includes growing of rice (including organic farming and the growing of genetically modified rice)</p>
		0113		Growing of vegetables and melons, roots and tubers
			01131	<p>Growing of taro</p> <p>This sub-class includes growing of taro.</p>
			01132	<p>Growing of cassava</p> <p>This sub-class includes growing of cassava</p>
			01133	<p>Growing of yam</p> <p>This sub-class includes growing of yam</p>
			01134	<p>Growing of kumala</p> <p>This sub-class includes growing of kumala</p>
			01139	<p>Growing of vegetables and melons, roots and tubers n.e.c.</p> <p>This sub-class includes: -growing of leafy or stem vegetables such as cabbages, cauliflower, lettuce, spinach and other leafy or stem vegetables -growing of fruit bearing vegetables such as cucumbers, eggplants (aubergines), tomatoes and other melons and fruit-bearing vegetables -growing of root, bulb or tuberous vegetables such as carrots, turnips, garlic, onions (incl. shallots), other alliaceous vegetables and other root, bulb or tuberous vegetables -growing of mushrooms -growing of vegetable seeds -growing of other vegetables -growing of roots and tubers</p> <p>This sub-class excludes: -growing of watermelons, see 01226 -growing of mushroom spawn, see 01301 -growing of chilies and peppers (capsicum) and other spices and aromatic crops, see 01289</p>

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
		0114	01141	Growing of sugar cane This sub-class includes growing of sugar cane.
		0115	01151	Growing and curing of tobacco This sub-class includes growing of unmanufactured tobacco. Preliminary processing e.g. drying of tobacco leaves is included.
		0116	01161	Growing of fibre crops This sub-class includes growing of cotton or other vegetable textile fibres.
		0119	01191	Growing of other non-perennial crops This sub-class includes the growing of non-perennial crops n.e.c. such as -growing of fodder roots, clover, alfalfa, maize and other grasses, forage kale and similar forage products -growing of seeds of forage plants -growing of flowers, including production of cut flowers and flower buds -growing of flower seeds This sub-class excludes: -growing of sunflower seeds, see 01111 -growing of non-perennial spice, aromatic, drug and pharmaceutical crops, see 01289
	012			Growing of perennial crops This sub-group includes the growing of perennial crops, i.e. plants that lasts for more than two growing seasons, either dying back after each season or growing continuously. Included is the growing of these plants for the purpose of seed production.
		0112	01121	Growing of grapes This sub-class includes: -growing of wine grapes and table grapes in vineyards
		0122		Growing of tropical and subtropical fruits
			01221	Growing of bananas This sub-class includes growing of bananas
			01222	Growing of pineapples

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				This sub-class includes growing of pineapples
			01223	Growing of mangoes This sub-class includes growing of mangoes
			01224	Growing of papayas This sub-class includes growing of papayas
			01225	Growing of noni This sub-class includes growing of noni.
			01226	Growing of watermelon This sub-class includes growing of watermelon.
			01229	Growing of tropical and subtropical fruits n.e.c. This sub-class includes growing of tropical and subtropical fruits e.g. avocados and other tropical and subtropical fruits
		0123	01231	Growing of citrus fruits This sub-class includes growing of oranges and other citrus fruit.
		0125	01251	Growing of other tree and bush fruits and nuts This sub-class includes: -growing of berries: -growing of fruit seeds -growing of edible nuts e.g. peanuts -growing of other tree and bush fruits: This sub-class excludes: -growing of coconuts, see 01261
		0126	01261	Growing of oleaginous fruits This sub-class includes growing of oleaginous fruits e.g. coconuts and other oleaginous fruits This sub-class excludes: -growing of soya beans, groundnuts and other oil seeds, see 01111
		0127		Growing of beverage crops
			01271	Growing of cocoa

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				This sub-class includes growing of cocoa
			01272	Growing of coffee This sub-class includes growing of coffee
		0128		Growing of spices, aromatic, drug and pharmaceutical crops
			01281	Growing of ginger This sub-class includes growing of ginger.
			01282	Growing of yaqona This sub-class includes growing of yaqona.
			01283	Growing of vanilla This sub-class includes growing of vanilla
			01289	Growing of spices, aromatic, drug and pharmaceutical crops n.e.c. This sub-class includes: -growing of perennial and non-perennial spices and aromatic crops not elsewhere specified e.g. pepper (piper), chilies and peppers (capsicum) and other spices and aromatic crops -growing of drug and narcotic crops -growing of plants used primarily in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes
		0129	01299	Growing of other perennial crops This sub-class includes growing of vegetable materials of a kind used primarily for plaiting
		0130	01301	Plant propagation This sub-class includes the production of all vegetative planting materials including cuttings, suckers and seedlings for direct plant propagation or to create plant grafting stock into which selected scion is grafted for eventual planting to produce crops e.g. growing of plants for planting; growing of plants for ornamental purposes, including turf for transplanting; growing of live plants for bulbs, tubers and roots; cuttings and slips; mushroom spawn; operation of tree nurseries, except forest tree nurseries This sub-class excludes: -growing of plants for the purpose of seed production, see groups 011 and 012

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				-operation of forest tree nurseries, see class 0210
	014			<p>Animal production</p> <p>This group includes raising (farming) and breeding of all animals, except aquatic animals.</p> <p>This group excludes:</p> <ul style="list-style-type: none"> -breeding support services, such as stud services, see 01619 -farm animal boarding and care, see 01619 -production of hides and skins from slaughterhouses, see 10102

			01411	<p>Raising and breeding of cattle and buffaloes</p> <p>This sub-class includes raising and breeding of cattle and buffaloes</p> <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -production of raw milk, see 01412
			01412	<p>Production of raw cow milk from cows or buffaloes</p> <p>This sub-class includes production of raw cow milk from cows or buffaloes</p> <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -processing of milk, see 10501
		0142	01421	<p>Raising of horses and other equines</p> <p>This sub-class includes raising and breeding of horses (including racing horses)</p> <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -operation of racing and riding stables, see 93199
		0144		Raising of sheep and goats
			01441	<p>Raising and breeding of sheep</p> <p>This sub-class includes raising and breeding of sheep</p> <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -sheep shearing on a fee or contract basis, see 01619 -production of pulled wool, see 10102
			01442	<p>Raising of goats</p> <p>This sub-class includes raising and breeding of goats</p>

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
		0145	01451	Raising of swine/pigs This sub-class includes raising and breeding of swine (pigs)
		0146		Raising of poultry
			01461	Raising and breeding of poultry This sub-class includes fowls of the species Gallus domesticus (chickens and capons), ducks, geese, turkeys and guinea fowls This sub-class excludes: -production of feathers or down, see 10101
			01462	Production of eggs This sub-class includes -poultry farming for production of eggs -operation of poultry hatcheries
		0149		Raising of other animals
			01491	Bee-keeping This sub-class includes the production of honey.
			01492	Other animal farming; production of animal products n.e.c. This sub-class includes raising of live animals and production of animal products n.e.c.
		0150	01501	Mixed farming This sub-class includes the combined production of crops and animals without a specialized production of crops or animals. The size of the overall farming operation is not a determining factor. If either production of crops or animals in a given unit exceeds 66 per cent or more of standard gross margins, the combined activity should not be included here, but allocated to crop or animal farming. This sub-class excludes: -mixed crop farming, see groups 011 and 012 -mixed animal farming, see group 014
	016	0161	01619	Support activities to agriculture and post-harvest crop activities This sub-class includes: -support activities for crop production -agricultural activities on a fee or contract basis e.g. preparation of fields, establishing a crop, treatment of

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				<p>crops, crop spraying, including by air, trimming of fruit trees and vines, transplanting of rice, thinning of beets, harvesting and pest control (including rabbits) in connection with agriculture</p> <ul style="list-style-type: none"> -operation of agricultural irrigation equipment -provision of agricultural machinery with operators and crew -maintenance of land to keep it in good condition for agricultural use <p>-support activities for animal production</p> <ul style="list-style-type: none"> -agricultural activities on a fee or contract basis e.g. activities to promote propagation, growth and output of animals, herd testing services, droving services, poultry caponizing, coop, cleaning etc., activities related to artificial insemination, stud services, sheep shearing, farm animal boarding and care -activities of farriers <p>-post-harvest crop activities</p> <ul style="list-style-type: none"> -preparation of crops for primary markets, i.e. cleaning, trimming, grading, disinfecting -cotton ginning -preparation of tobacco leaves -preparation of cocoa beans -waxing of fruit -sun-drying of fruit and vegetables <p>-seed processing for propagation</p> <ul style="list-style-type: none"> -all post-harvest activities aimed at improving the propagation quality of seed through the removal of non-seed materials, undersized, mechanically or insect damaged and immature seeds as well as removing the seed moisture to a safe level for seed storage. The treatment of genetically modified seeds is included here. <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -activities of agronomists and agricultural economists, see 74909 -landscape gardening, planting, see 81301 -maintenance of land to keep it in good ecological condition, see 81301 -organization of agricultural shows and fairs, see 82301 -activities of farriers -veterinary activities, see 75001 -vaccination of animals, see 75001 -renting of animals (e.g. herds), see 77301 -pet boarding, see 96099 -preserving of fruit and vegetables, including dehydration by artificial means, see 10301 -stemming and redrying of tobacco, see 12001
	017	0170	01701	Hunting, trapping and related service activities

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				<p>This sub-class includes:</p> <ul style="list-style-type: none"> -hunting and trapping on a commercial basis -taking of animals (dead or alive) for food, fur, skin, or for use in research, in zoos or as pets -production of fur skins, reptile or bird skins from hunting or trapping activities <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -hunting for sport or recreation and related service activities, see 93199
02				<p>FORESTRY AND LOGGING</p> <p>This division includes the production of round wood for the forest-based manufacturing industries as well as the extraction and gathering of wild growing non-wood forest products. Besides the production of timber, forestry activities result in products that undergo little processing, such as fire wood, charcoal, wood chips and round wood used in an unprocessed form (e.g. pit-props, pulpwood etc.). These activities can be carried out in natural or planted forests.</p>
	021	0210		<p>Silviculture and other forestry activities</p> <p>This group includes the growing of standing timber: planting, replanting, transplanting, thinning and conserving of forests and timber tracts; growing of coppice, pulpwood and fire wood and operation of forest tree nurseries</p>

03				<p>FISHING AND AQUACULTURE</p> <p>This division includes capture fishery and aquaculture, covering the use of fishery resources from marine, brackish or freshwater environments, with the goal of capturing or gathering fish, crustaceans, molluscs and other marine organisms and products (e.g. aquatic plants, pearls, sponges etc).</p> <p>Also included are activities that are normally integrated in the process of production for own account (e.g. seeding oysters for pearl production).</p>
	031			<p>Fishing</p> <p>This group includes capture fishery, i.e. the hunting, collecting and gathering activities directed at removing or collecting live wild aquatic organisms (predominantly fish, molluscs and crustaceans) including plants from the oceanic, coastal or inland waters for human consumption and other purposes by hand or more usually by various types of fishing gear such as nets, lines and stationary traps. Such activities can be conducted on the intertidal shoreline (e.g. collection of molluscs such as mussels and oysters) or shore based netting, or from home-made dugouts or more commonly using commercially made boats in inshore, coastal waters or offshore waters. Unlike in aquaculture (group 032), the aquatic resource being captured is usually common property resource irrespective of whether the harvest from this resource is undertaken with or without exploitation rights. Such activities also include fishing restocked water bodies.</p>
		0311		<p>Marine fishing</p> <p>This class includes activities of vessels engaged in fishing in ocean and coastal waters.</p> <p>This class excludes: -capturing of marine mammals see 01701 -processing of fish, crustaceans and molluscs on factory ships or in factories ashore, see 10201 -fishing inspection, protection and patrol services, see 84231 -fishing practiced for sport or recreation and related services, see 93299 -operation of sport fishing preserves, see 93299</p>

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			03111	Marine fishing on a commercial basis This sub-class includes fishing on a commercial basis in ocean and coastal waters.
			03112	Taking of marine crustaceans and molluscs This sub-class includes taking of marine crabs, prawns, etc in ocean and coastal waters.
			03113	Taking of marine aquatic animals: turtles, sea squirts, tunicates, sea urchins etc This sub-class includes turtle hunting, fishing for octopus etc in ocean and coastal waters.
			03114	Beach-de-mer diving This sub-class includes beach-de-mer diving in ocean and coastal waters.
			03115	Gathering of other marine organisms and materials This sub-class includes gathering of other marine organisms and materials: natural pearls, sponges, coral and algae in ocean and coastal waters.
		0312		Freshwater fishing This class includes fishing in inland waters. This class excludes: -fishing inspection, protection and patrol services, see 84231 -fishing practiced for sport or recreation and related services, see 93299 -operation of sport fishing preserves, see 93299
			03121	Freshwater fishing on a commercial basis This sub-class includes fishing on a commercial basis in inland waters.
			03122	Taking of freshwater crustaceans and molluscs This sub-class includes taking of freshwater crabs, prawns, kai etc in inland waters
			03123	Taking of freshwater aquatic animals This sub-class includes taking of freshwater aquatic animals in inland waters

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			03124	<p>Gathering of freshwater materials</p> <p>This sub-class includes gathering of freshwater organisms and materials: pearls, etc in inland waters</p>
	032			<p>Aquaculture</p> <p>This group includes aquaculture (or aqua farming), i.e. the production process involving the culturing or farming (including harvesting) of aquatic organisms (fish, molluscs, crustaceans, plants, etc) using techniques designed to increase the production of the organisms in question beyond the natural capacity of the environment (for example regular stocking, feeding and protection from predators).</p> <p>Culturing/farming refers to the rearing up to their juvenile and/or adult phase under captive conditions of the above organisms. In addition, aquaculture also encompasses individual, corporate or state ownership of the individual organisms throughout the rearing or culture stage, up to and including harvesting.</p>
		0321	03211	<p>Marine aquaculture</p> <p>This sub-class includes:</p> <ul style="list-style-type: none"> -fish farming in sea water including farming of marine ornamental fish -production of bivalve spat (oyster mussel etc.), lobster lings, shrimp post-larvae, fish fry and fingerlings -growing of laver and other edible seaweeds -culture of crustaceans, bivalves, other molluscs and other aquatic animals in sea water -aquaculture activities in brackish waters -aquaculture activities in salt water filled tanks or reservoirs -operation of fish hatcheries (marine) -operation of marine worm farms <p>This sub-class excludes:</p> <ul style="list-style-type: none"> -operation of sport fishing preserves, see 93299
		0322	03222	<p>Freshwater aquaculture</p> <p>This sub-class includes:</p> <ul style="list-style-type: none"> -fish farming in freshwater including farming of freshwater ornamental fish -culture of freshwater crustaceans, bivalves, other molluscs and other aquatic animals -operation of fish hatcheries (freshwater)

SECTION B: MINING AND QUARRYING

This section includes the extraction of minerals occurring naturally as solids e.g. ores, liquids e.g. petroleum or gases e.g. natural gas. Extraction can be achieved by different methods such as underground or surface mining, well operation, seabed mining etc. This section also includes supplementary activities aimed at preparing the crude materials for marketing e.g. crushing, grinding, cleaning, drying, sorting, concentrating ores, liquefaction of natural gas and agglomeration of solid fuels. These operations are often carried out by the units that extract the resource and/or others located nearby.

This section excludes the processing of the extracted materials (see section C—Manufacturing), which also covers the bottling of natural spring and mineral waters at springs and wells (see class 11042) or the crushing, grinding or otherwise treating certain earths, rocks and minerals not carried out in conjunction with mining and quarrying (see class 23999). This section also excludes the usage of the extracted materials without a further transformation for construction purposes (see section F—Construction), the collection, purification and distribution of water (see class 36001), separate site preparation activities for mining (see class 43101) and geophysical, geologic and seismic surveying activities (see class 71101).

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
07				MINING OF METAL ORE
	072			Mining of non-ferrous metal ores
		0729		Mining of other non-ferrous metal ores
			07291	Mining of gold and silver This sub-class includes mining and preparation of gold and silver ores valued chiefly for the gold and silver content
			07292	Mining of copper This sub-class includes mining and preparation of copper ores valued chiefly for the copper content
08				OTHER MINING AND QUARRYING
	081	0810	08101	Quarrying of stone, sand and clay This sub-class includes: -quarrying, rough trimming and sawing of monumental and building stone -quarrying, crushing and breaking of limestone -mining of gypsum and anhydrite -mining of chalk and uncalcined dolomite -extraction and dredging of industrial sand, sand for construction and gravel

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				-breaking and crushing of stone and gravel -quarrying of sand -mining of clays, refractory clays etc This sub- class excludes: -production of calcined dolomite, see 23942
	089	0899	08999	Mining and quarrying nec This sub-class includes all other mining and quarrying e.g. salt etc not elsewhere classified
09				MINING SUPPORT SERVICE ACTIVITIES
	099	0990	09901	Support activities for other mining and quarrying This sub-class includes support services on a fee or contract basis, required for mining activities of divisions 07 and 08: -exploration services, e.g. traditional prospecting methods, such as taking core samples and making geological observations at prospective sites -draining and pumping services, on a fee or contract basis -test drilling and test hole boring This sub-class excludes: -operating mines or quarries on a contract or fee basis, see division 07 or 08 -specialized repair of mining machinery, see 33121 -geophysical surveying services, on a contract or fee basis, see 71101

SECTION C: MANUFACTURING

This section includes the physical or chemical transformation of materials, substances, or components into new products, although this cannot be used as the single universal criterion for defining manufacturing (see remark on processing of waste below). The materials, substances, or components transformed are raw materials that are products of agriculture, forestry, fishing, mining or quarrying as well as products of other manufacturing activities. Substantial alteration, renovation or reconstruction of goods is generally considered to be manufacturing.

Units engaged in manufacturing are often described as plants, factories or mills and characteristically use power-driven machines and materials-handling equipment. However, units that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public of products made on the same premises from which they are sold, such as bakeries and custom tailors, are also included in this section. Manufacturing units may process materials or may contract with other units to process their materials for them. Both types of units are included in manufacturing.

The output of a manufacturing process may be finished in the sense that it is ready for utilization or consumption, or it may be semi-finished in the sense that it is to become an input for further manufacturing. For example, the output of alumina refining is the input used in the primary production of aluminium; primary aluminium is the input to aluminium wire drawing; and aluminium wire is the input for the manufacture of fabricated wire products.

Manufacture of specialized components and parts of, and accessories and attachments to, machinery and equipment is, as a general rule, classified in the same class as the manufacture of the machinery and equipment for which the parts and accessories are intended. Manufacture of unspecialized components and parts of machinery and equipment, e.g. engines, pistons, electric motors, electrical assemblies, valves, gears, roller bearings, is classified in the appropriate class of manufacturing, without regard to the machinery and equipment in which these items may be included. However, making specialized components and accessories by moulding or extruding plastic materials are included in sub-class 22201.

Assembly of the component parts of manufactured products is considered manufacturing. This includes the assembly of manufactured products from either self-produced or purchased components.

The recovery of waste, i.e. the processing of waste into secondary raw materials is classified in class 38301 (Materials recovery). While this may involve physical or chemical transformations, this is not considered to be a part of manufacturing. The primary purpose of these activities is considered to be the treatment or processing of waste and they are therefore classified in Section E (Water supply; sewerage, waste management and remediation activities). However, the manufacture of new final products (as opposed to secondary raw materials) is classified in manufacturing, even if these processes use waste as an input. For example, the production of silver from film waste is considered to be a manufacturing process.

Specialized maintenance and repair of industrial, commercial and similar machinery and equipment is, in general, classified in division 33 (Repair and installation of machinery and equipment). However, the repair of computers and personal and household goods is classified in division 95 (Repair of computers and personal and household goods), while the repair of motor vehicles is classified in division 45 (Wholesale and retail trade and repair of motor vehicles and motorcycles).

Remark: The boundaries of manufacturing and the other sectors of the classification system can be somewhat blurry. As a general rule, the activities in the manufacturing section involve the transformation of materials into new products. Their output is a new product. However, the definition of what constitutes a new product can be somewhat subjective. As clarification, the following activities are considered manufacturing in FSIC:

- milk pasteurizing and bottling (see 10501)
- fresh fish processing (oyster shucking, fish filleting), not done on a fishing boat (see 10201)
- printing and related activities (see 18111)
- ready-mixed concrete production (see 23951)
- wood preserving (see 16101)
- electroplating, plating, metal heat treating, and polishing (see 25901)
- tyre retreading (see 22111)

Conversely, there are activities that, although sometimes involving transformation processes, are classified in other sections of FSIC; in other words, they are not classified as manufacturing. They include:

- logging, classified in section A (Agriculture, forestry and fishing);
- beneficiating of agricultural products, classified in section A (Agriculture, forestry and fishing);
- beneficiating of ores and other minerals, classified in section B (Mining and quarrying);
- construction of structures and fabricating operations performed at the site of construction, classified in section F (Construction);
- activities of breaking bulk and redistribution in smaller lots, including packaging, repackaging or bottling of products, such as liquors or chemicals; sorting of scrap; mixing of paints to customers' order; and cutting of metals to customers' order, producing a modified version of the same product, are classified to section G (Wholesale and retail trade; repair of motor vehicles and motorcycles).

SECTION D: ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY

This section includes the activity of providing electric power, natural gas, steam, hot water and the like through a permanent infrastructure (network) of lines, mains and pipes. The dimension of the network is not decisive; also included are the distribution of electricity, gas, steam, hot water and the like in industrial parks or residential buildings. This section therefore includes the operation of electric and gas utilities, which generate, control and distribute electric power or gas. Also included is the provision of steam and air-conditioning supply.

This section excludes the operation of water and sewerage utilities, see 36, 37. This section also excludes the (typically long-distance) transport of gas through pipelines.

SECTION E: WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES

This section includes activities related to the management (including collection, treatment and disposal) of various forms of waste, such as solid or non-solid industrial or household waste, as well as contaminated sites. The output of the waste or sewage treatment process can either be disposed off or become an input into other production processes. Activities of water supply are also grouped in this section, since they are often carried out in connection with, or by units also engaged in, the treatment of sewage.

SECTION F: CONSTRUCTION

This section includes general construction and specialized construction activities for buildings and civil engineering works. It includes new work, repair, additions and alterations, the erection of prefabricated buildings or structures on the site and also construction of a temporary nature.

General construction is the construction of entire dwellings, office buildings, stores and other public and utility buildings, farm buildings etc., or the construction of civil engineering works such as motorways, streets, bridges, tunnels, airfields, harbours and other water projects, irrigation systems, sewerage systems, industrial facilities, pipelines and electric lines, sports facilities etc.

This work can be carried out on own account or on a fee or contract basis. Portions of the work and sometimes even the whole practical work can be subcontracted out. A unit that carries the overall responsibility for a construction project is classified here.

Also included is the repair of buildings and engineering works.

The renting of construction equipment with operator is classified with the specific construction activity carried out with this equipment.

This section also includes the development of building projects for buildings or civil engineering works by bringing together financial, technical and physical means to realize the construction projects for later sale. If these activities are carried out not for later sale of the construction projects, but for their operation (e.g. renting of space in these buildings, manufacturing activities in these plants), the unit would not be classified here, but according to its operational activity, i.e. real estate, manufacturing etc.

SECTION G: WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES

This section includes wholesale and retail sale i.e. sale without transformation of goods and the rendering of services incidental to the sale of these goods. Goods bought and sold are also referred to as merchandise and wholesaling and retailing are the final steps in the distribution of these goods. Also included in this section are the repair of motor vehicles and motorcycles.

Sale without transformation is considered to include the usual operations or manipulations associated with trade, for example sorting, grading and assembling of goods, mixing (blending) of goods (for example sand), bottling (with or without preceding bottle cleaning), packing, breaking bulk and repacking for distribution in smaller lots, storage (whether or not frozen or chilled), cleaning and drying of agricultural products, cutting out of wood fibreboards or metal sheets as secondary activities.

The distinction between wholesale and retail sale is based on the predominant type of customer.

Wholesale is the resale of new and used goods to retailers, to industrial, commercial, institutional or professional users, or to other wholesalers, or involves acting as an agent or broker in buying goods for, or selling goods to, such persons or companies. The principal types of businesses included are merchant wholesalers, i.e. wholesalers who take title to the goods they sell, such as wholesale merchants, industrial distributors, exporters, importers, and cooperative buying associations, sales branches and sales offices (but not retail stores) that are maintained by manufacturing or mining units apart from their plants or mines for the purpose of marketing their products and that do not merely take orders to be filled by direct shipments from the plants or mines. Also included are merchandise brokers, commission merchants and agents and assemblers, buyers and cooperative associations engaged in the marketing of farm products. Wholesalers frequently physically assemble, sort and grade goods in large lots, break bulk, repack and redistribute in smaller lots, for example pharmaceuticals; store, refrigerate, deliver and install goods, engage in sales promotion for their customers and label design.

Retailing is the resale of new and used goods mainly to the general public for personal or household consumption or utilization, by shops, department stores, stalls, mail-order houses, door-to-door sales persons, hawkers and peddlers, consumer cooperatives, auction houses etc. Most retailers take title to the goods they sell, but some act as agents for a principal and sell either on consignment or on a commission basis.

SECTION O: PUBLIC ADMINISTRATION AND DEFENSE; COMPULSORY SOCIAL SECURITY

This section includes activities of a governmental nature, normally carried out by the public administration. This includes the enactment and judicial interpretation of laws and their pursuant regulation, as well as the administration of programmes based on them, legislative activities, taxation, national defence, public order and safety, immigration services, foreign affairs and the administration of government programmes. This section also includes compulsory social security activities.

The legal or institutional status is not, in itself, the determining factor for an activity to belong in this section, rather than the activity being of a nature specified in the previous paragraph. This means that activities classified elsewhere in FSIC do not fall under this section, even if carried out by public entities. For example, administration of the school system (i.e. regulations, checks, curricula) falls under this section, but teaching itself does not (see section P), and a prison or military hospital is classified to health (see section Q). Similarly, some activities described in this section may be carried out by non-government units.

SECTION P: EDUCATION

This section includes education at any level or for any profession, oral or written as well as by radio and television or other means of communication. It includes education by the different institutions in the regular school system at its different levels as well as adult education, literacy programmes etc. Also included are military schools and academies, prison schools etc. at their respective levels. The section includes public as well as private education.

For each level of initial education, the classes include special education for physically or mentally handicapped pupils.

The breakdown of the categories in this section is based on the level of education offered as defined by the levels of International Standard Classification of Education (ISCED) 1997. The activities of educational institutions providing education at ISCED levels 0 and 1 are classified in group 851, those at ISCED levels 2 and 3 in group 852 and those at ISCED levels 4, 5 and 6 in group 853.

This section also includes instruction primarily concerned with sport and recreational activities such as bridge or golf and education support activities.
