CONSUMER PRICE INDEX – FEBRUARY 2021

[Base: Average 12 months 2014 = 100.0]

The Consumer Price Index [CPI] is compiled to indicate average changes in the prices of goods and services purchased by households nationwide with monthly price collections carried out in the urban areas [Suva, Lami, Nasinu, Nausori, Lautoka, Nadi, Ba and Labasa]. The index is currently taken to represent price changes in the rural areas as well. The CPI weights are derived from the Household Income and Expenditure Survey [HIES] of 2013/2014.

FEBRUARY 2021 Highlights

The average annual rate of inflation for the twelve months to February 2021 [i.e. comparing the average CPI for the 12 months from March 2020 – February 2021; with the average for the 12 months from March 2019 – February 2020] stands at -2.2 percent while the month- on-month inflation rate [compared with January 2020] stands at 1.1 percent.

The All Items CPI for the month of February registered an increase of 2.0 percent over January 2021 [112.3] and stands at 114.6.

There are two measures of inflation used in Fiji. One compares the average CPI over the past twelve months with the average CPI over the previous twelve months while the other compares the CPI in the current month with the CPI in the comparable month of the previous year.

Details of price changes between January 2021 and February 2021 by expenditure class are as follows:
