PREFACE

The report presents findings from the Agriculture, Forestry and Fishing Industries study of 2013. The study was carried out to gather information required for the compilation of macroeconomic aggregates such as Gross Output, Intermediate Consumption, Compensation of Employees, Consumption of Fixed Capital, Operating Surplus and Value Added. The Value Added figure gives us the net output of goods and services produced by the above mentioned industries which determines their contribution to Fiji's economy.

Knowledge about these macroeconomic aggregates is important because they are indicators or main signposts signaling current trends in these industries.

Those interested in the Agriculture, Forestry and Fishing Industries will find the report useful as it will allow them to study, analyze, and understand the major variables that determine current trends. Findings from the report can also be used to identify areas needing improvement.

Information contained in this report will be used to build up a system of national accounts which allows us to construct a quantitative image of Fiji's economic system.

This study would not have been possible without the assistance of a good number of helpful individuals and organizations. Their effort is much appreciated and I look forward to their continued support in the future.

Epeli Waqavonovono
Government Statistician

ACKNOWLEDGEMENT

Department of Agriculture:

Mrs. Sera Bose
Ms. Joana T. Rakaboa
Ms Inise Naivalu
Ms. Alitia Yaya
Agriculture technical officers
Mrs. Bikashni Prasad

Department of Fisheries & Forestry:

Ms. Atelaite Rokosuka
Ms. Apimeleki Cokanasiga
Mr. Viliame Rokovu
Mr. Manueli Cakautabu
Mr. Anare Raiwalui
Mr. Shalen Singh
Mr. Netani Tavaga

All farmers and establishments.

NOTES TO THE REPORT

1 The interpretation of the symbols used in this report is as follows:

0	nil return or a figure less than half the given value
r	revised
p	provisional
N/A	Not Available

2 Total values are subject to rounding errors.

3 Key to Abbreviations:

Abbreviation	Terms
CFC	Consumption of Fixed Capital
COE	Compensation of Employees
EP&S	Economic Planning and Statistics
FBoS	Fiji Bureau of Statistics
FSIC	Fiji Standard Industrial Classification
FSC	Fiji Sugar Corporation
GFCF	Gross Fixed Capital Formation
GO	Gross Output
IC	Intermediate Consumption
MFE	Milk Fat Equivalent
OS	Operating Surplus
SNA	System of National Accounts
VA	Value Added

4 VA in the report refers to Gross Value Added

5 Wages do not include an imputation for family help. This labour compensation appears under operating surplus.

6 A lot of farmers engage in mixed farming together with the main crop e.g. farming of vegetables together with taro, which is the main crop. In such a case the activities of the farmer will be covered under taro which is assigned FSIC 01131.

7 The Macroeconomic aggregates (GO, IC, VA, COE, CFC and OS) of the commodities are expressed in Fiji Dollars.

LIST OF APPENDICES

1 INTRODUCTION

1.1 History of studies undertaken

This report contains the results of the 2013 study on the Agriculture, Forestry and Fishing industries taking place in Fiji together with other relevant information on the industry. It was an ad hoc study and now conducted by the Fiji Bureau of Statistics (FBoS) annually because of the need by its National Accountants to re-base the constant price Gross Domestic Product (GDP) for Agriculture, Forestry and Fishing Industries.

A brief description of similar studies done in the past is given below in chronological order:

1989

The purpose of conducting a study for 1989 was to determine the benchmark levels for the Agriculture, Forestry and Fishing industries in the rebasing of the constant price GDP from 1977 to 1989. The results of the study are contained in the report titled "*A Study of Agriculture, Forestry and Fishing Sector for the compilation of the 1989 Gross Domestic Product."*

1995

The 1995 study was also conducted to determine the benchmark levels for the Agriculture, Forestry and Fishing industries in the rebasing of the constant price GDP, but this time, from 1989 to 1995. The results of the study are contained in the report titled "*1995 Gross Domestic Product Sources and Methods"*.

2002

The 2002 study of the Agriculture, Forestry and Fishing industries was conducted for the rebasing of the constant price GDP from 1995 to 2002. The outcomes of the study are contained in the report titled "*A Study of the Agriculture, Forestry and Fishing Sector 2002"*.

2008

Another study of the Agriculture, Forestry and Fishing industries was conducted in 2008, for the rebasing of the constant price GDP from 2002 to 2008. The outcomes of the study are contained in the report titled "*A Study of the Agriculture, Forestry and Fishing Industries 2008"*.

2011

Another study of the Agriculture, Forestry and Fishing industries was conducted in 2011, for the rebasing of the constant price GDP from 2008 to 2011. The outcomes of the study are contained in the report titled "*A Study of the Agriculture, Forestry and Fishing Industries 2011"*. From 2011 the survey has been conducted annually.

1.2 Need for statistics relating to Agriculture, Forestry and Fishing

Agriculture, Forestry and Fishing activities are widely scattered in the country and the economic function they perform in channeling the flow of goods from the producer to the consumer is of great importance. These industries account for a substantial proportion of the total economic activity, whether in terms of the sector to the GDP or in terms of its share of total employment and Gross Fixed Capital Formation (GFCF).

Statistics on Agriculture, Forestry and Fishing are needed for the preparation of national accounts so that a meaningful study of the whole economy can be made. The data can also be used to construct the input-output table that shows the inter-connection of the Agriculture, Forestry and Fishing industries with other industries.

Policy makers too require the data for formulating sound economic and social policies that augment capital formation. In addition, the entities engaged in the Agriculture, Forestry and Fishing industries find the data helpful.

1.3 Peculiar features of the Agriculture, Forestry and Fishing industry

Despite difficulties faced due to the peculiar features of the sector, great care was taken whilst conducting the study. Nevertheless, it is possible that some omission or double-counting may have occurred, but not that large to be able to affect the overall results in any significant way. The peculiar features of the industries are:

- The industries are highly sensitive to weather. Droughts, floods and hurricanes are natural disasters that have great impact on the industries.

- Period of production is relatively long in some cases, for example, trees take years to mature so therefore the forestry sector can experience high intermediate costs in some years, but suddenly a very high value added in a particular year.

- Activities are carried out by a wide variety of units, e.g.
    - small and large business units. Due to the different size of business units engaged e.g. small and large farms in the growing of coconuts, caution has to be exercised in calculating the input ratios as they have an impact on the macroeconomic aggregates,
    - own account individuals. It has to be ascertained that they are not producing for own consumption only, and
    - other units whose main activities are in other industries. The need to include them in the study, if market activity is involved.

- Sub-leasing of farms is prevalent e.g. in the case of sugarcane – there is a probability that some work may have been double counted (if the co-tenant's work is not deducted from the main tenant, and also picked up for the co-tenant) or sometimes not counted at all (if the co-tenant's work is correctly deducted from the main tenant, but not picked up for the co-tenant).

- Many small establishments go in and out of business with changing economic and seasonal factors.

- Most small business units do not maintain proper records, so careful estimates are calculated.

2 METHODOLOGY

2.1 Legal Basis

The study was conducted under the provisions of the Statistics Act (Cap 71). This Act stipulates the collection of data, as well as protects the confidentiality of the information submitted.

2.2 Reference Period

The study conducted was for the calendar year 2013. If the accounting year differed from the calendar year, information was provided for the accounting year that covered the major part of the calendar year 2013.

2.3 Classification and Standard Used

- The Fiji Standard Industrial Classification (FSIC) 2010 has been used for classifying industries and commodities.
- The Macroeconomic Aggregates obtained are based on the 2008 System of National Accounts (SNA).

The coverage and scope of each activity and the survey procedures used are discussed in detail under **Detailed Discussion by commodities produced in the Agriculture, Forestry and Fishing industries.**

3 RESULTS

All data contained in this report are in Fiji Dollars and in current prices.

3.1 Macroeconomic Aggregates

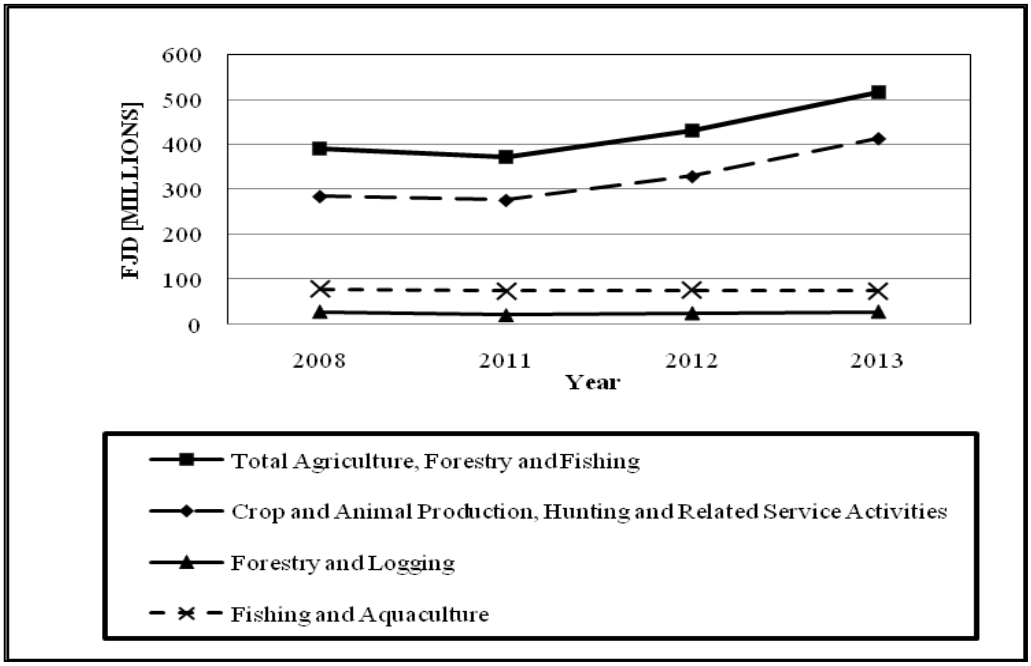
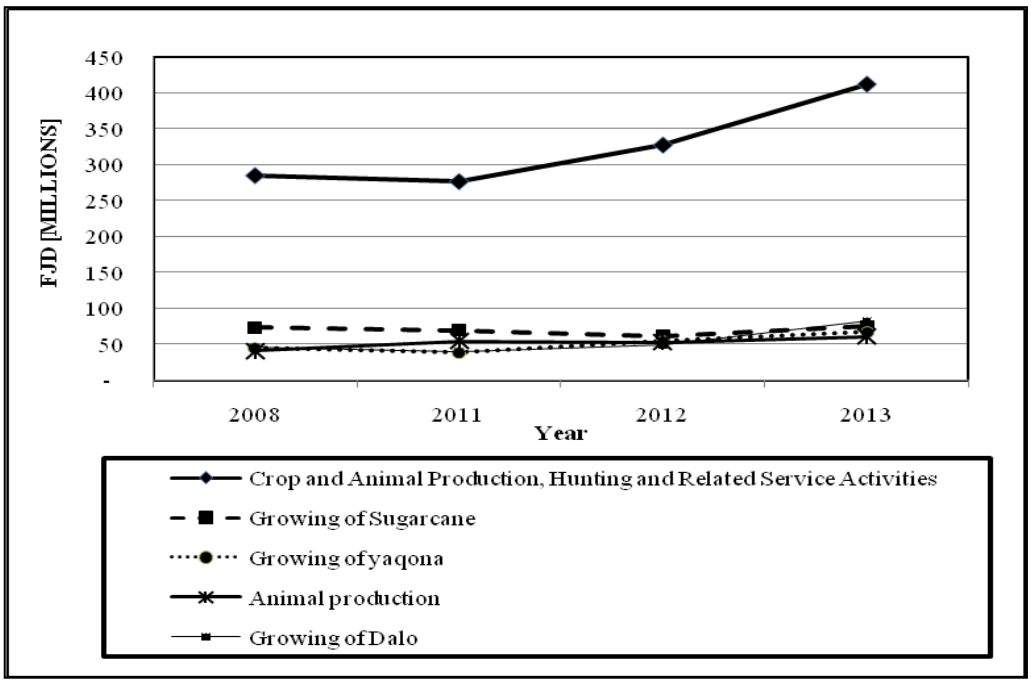
Graph 1: Agriculture, Forestry and Fishing Value Added (VA)

VA when graphed for the Agriculture, Forestry and the Fishing industries shows a decline from 2008 to 2011, followed by an increase from 2011 to 2012 and again an increase for 2013. Of the agriculture, forestry and fishing industries, it is the VA of agriculture that is driving the overall increase. The primary sector is dominated by agriculture, the VA of which comprised of 79.9 per cent of the total agriculture, forestry and the fishing industries in 2013,



76.4 per cent in 2012, 74.3 per cent in 2011 and 72.8 per cent in 2008.

Graph 2: The drivers of Value Added in Agriculture Industry



The agriculture industry VA drives the entire primary sector VA.

Graph 2 shows an increase in value added of the agriculture industry for the year 2013, driven by few of the commodities of which is sugarcane and yaqona. The value added of sugarcane, yaqona, which comprised of 34.6 per cent of the total agriculture industry in 2013, 35.6 per cent in 2012, 39.5 per cent in 2011 and 41.8 per cent in 2008.

4. Detailed discussion by commodities produced in the Agriculture, Forestry and Fishing industries.

Division 01: Crop and Animal Production, Hunting And Related Service Activities

1. Sub-Class 01111: Growing of cereals (except rice), leguminous crops and oil seeds

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Maize	122		813		
Cowpea	185		131		
Pulses	2,714		2,523		
Price per tonne:					
Maize	700		500		
Cowpea	1,000		1,000		
Pulses	1,033		800		
Macroeconomic Aggregates					
GO	3,073,962		2,555,900		-16.9
IC	1,147,318	37.3	899,677	35.2	-21.6
VA	1,926,644	62.7	1,656,223	64.8	-14.0
COE	204,794	6.7	138,019	5.4	-32.6
CFC	-	-	-	-	-
OS	1,721,850	56.0	1,518,204	59.4	-11.8

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of cereals (except rice), leguminous crops and oil seeds recorded a decline of 16.9 per cent compared to 2012. The decline was driven by decrease in price and the quantity produced.

A decline of 14.0 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

2. Sub-Class 01121: Growing of rice

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Rewa Rice (10% of Production)	462.0		628.0		
MPI Rice (90% of Production)	4,158.0		5,654.0		
Price per tonne:					
Rewa Rice	750		750		
MPI Rice	750		750		
Macroeconomic Aggregates					
GO	3,465,000		4,711,500		36.0
IC	1,502,866	43.4	2,091,906	44.4	39.2
VA	1,962,134	56.6	2,619,594	55.6	33.5
COE	335,191	9.7	452,304	9.6	34.9
CFC	-	-	-	-	-
OS	1,626,943	47.0	2,167,290	46.0	33.2

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of rice recorded a growth of 36.0 per cent compared to 2012. The growth was driven by increase in the quantity produced. A growth of 33.5 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

3. Sub-Class 01131: Growing of taro

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Taro	82,145		133,310		
Price per tonne:					
Taro	1,000		1,000

VA	52,981,603	68.4	41,336,275	69.6	-22.0
COE	13,986,096	18.1	9,977,722	16.8	-28.7
CFC	-	-	-	-	-
OS	38,995,507	50.4	31,358,553	52.8	-19.6

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of cassava recorded a decline of 23.3 per cent compared to 2012. The decline was driven by the decrease in the quantity produced. A decline of 22.0 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

5. Sub-Class 01133: Growing of yam

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Yam	5,026		4,976		
Price per tonne:					
Yam	1,379		1,500		
Macroeconomic Aggregates					
GO	6,930,854		7,464,000		7.7
IC	1,996,746	28.8	2,231,736	29.9	11.8
VA	4,934,108	71.2	5,232,264	70.1	6.0
COE	495,061	7.1	507,552	6.8	2.5
CFC	-	-	-	-	-
OS	4,439,047	64.0	4,724,712	63.3	6.4

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of yam recorded a growth of 7.7 per cent compared to 2012. The growth was driven by increase in the price. An increase of 6.0 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

6. Sub-Class 01134: Growing of kumala

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Kumala	9,402		8,546		
Price per tonne:					
Kumala	1,090		500		
Macroeconomic Aggregates					
GO	10,248,180		4,273,000		-58.3

VA	17,217,851	57.4	38,311,638	57.0	122.5
COE	2,998,474	10.0	6,183,633	9.2	106.2
CFC	349,352	1.2	537,707	0.8	53.9
OS	13,870,025	46.2	31,590,298	47.0	127.8

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of vegetables, and melons, roots and tubers n.e.c recorded a growth of 123.9 per cent compared to 2012. The growth was driven by increase in the price and quantity produced of assorted vegetables. A notable growth of 122.5 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

8. Sub-Class 01141: Growing of sugarcane

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Sugarcane	1,546,000		1,610,000		
Price per tonne:					
Sugarcane	70		83		
Macroeconomic Aggregates					
GO	108,220,000		133,825,000		23.7
IC	46,100,727	42.6	58,044,525	43.7	25.9
VA	62,119,273	57.4	74,780,475	56.3	20.4
COE	6,989,620	6.5	8,102,325	6.1	15.9
CFC	10,444,370	9.7	12,485,550	9.4	19.5
OS	44,685,283	41.3	54,192,600	40.8	21.3

(Production and producer price of the commodity were sourced from Fiji Sugar Corporation (FSC))

Season	Number of Registered Growers	Number of Active Growers	Area Harvested (hectares)
2012	15,948	12,507	42,000
2013	14,804	12,632	38,000
% change	-7.17	1.00	-9.52

Sugarcane is mostly grown on the Western side of Viti Levu and on Vanua Levu. Production is seasonal and starts around June-July and ends in December every year. Sometimes the season spills over to January of the next year, but the production is not significant.

This study is based on the financial year data i.e. year ended 31 March 2014 which reflects the season 2013. The 2013 season data is slightly different to the calendar year data that is required for the study. The reason for not using the calendar year data is that except production data no other data required for the study were available on a calendar year basis. Use of 2013 season data gives the best estimates for the calendar year 2013.

Data on total sugarcane production and the prices paid to the growers have been obtained from the Fiji Sugar Corporation (FSC). There was a decline in Total Area Harvested of 9.5 per cent in 2013 compared to 2012. This is due to the decline in the number of growers and the area harvested. Refer table above.

The decline in the number of growers, and as a consequence the area harvested is due to farmers moving out of sugarcane farming.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

A notable growth of 20.4 per cent was noted in the value added when compared to 2012.

9. Sub-Class 01151: Growing and curing of tobacco

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in Hectares:					
Land Area Cultivated	338		240		
Price per tonne:					
Average price paid to farmers	17,900		13,490		
Macroeconomic Aggregates					
GO	6,050,200		3,237,600		-46.5
IC	3,736,068	61.8	1,945,798	60.1	-47.9
VA	2,314,132	38.2	1,291,802	39.9	-44.2

CFC	-	-	-	-	-
OS	2,118,964	35.0	1,210,862	37.4	-42.9

(Production and producer price of the commodity were sourced from British American Tobacco)

The gross output of tobacco recorded a decline of 46.5 per cent compared to 2012. The decline was driven by decrease in the price and quantity produced of tobacco. A decline of 44.2 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

10. Sub-Class 01221: Growing of bananas

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Banana	3,341		4,634		
Price per tonne:					
Banana	1,000		1,200		
Macroeconomic Aggregates					
GO	3,341,000		5,560,800		66.4
IC	505,244	15.1	861,924	15.5	70.6
VA	2,835,756	84.9	4,698,876	84.5	65.7
COE	43,864	1.3	66,730	1.2	52.1
CFC	-	-	-	-	-
OS	2,791,892	83.6	4,632,146	83.3	65.9

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of banana recorded a growth of 66.4 per cent compared to 2012. The growth was driven by increase in the price and quantity produced. A growth of 65.7 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

11. Sub-Class 01222: Growing of pineapples

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes					
Pineapple	4,953		5,771		
Price per tonne:					
Pineapple	1,000		1,000		
Macroeconomic Aggregates					
GO	4,953,000		5,771,000		16.5
IC	1,520,989	30.7	1,708,216	29.6	12.3

CFC	28,255	3.1	25,872	2.1	-8.4
OS	427,869	47.1	569,184	46.2	33.0

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of sheep recorded a growth of 35.8 per cent compared to 2012. The growth was driven by increase in the price and quantity produced. An increase of 30.5 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

28. Sub-Class 01442: Raising of goats

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Goat	170		150		
Price per tonne (Dressed Weight):					
Goat	11,626		8,500		
Macroeconomic Aggregates					
GO	1,976,420		1,275,000		-35.5
IC	567,834	28.7	385,050	30.2	-32.2
VA	1,408,586	71.3	889,950	69.8	-36.8
COE	82,511	4.2	48,450	3.8	-41.3
CFC	33,106	1.7	30,600	2.4	-7.6
OS	1,292,969	65.4	810,900	63.6	-37.3

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of goats recorded a decline of 35.5 per cent compared to 2012. The decline was driven by decrease in the price and quantity produced. A decline of 36.8 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

29. Sub-Class 01451: Raising of swine/pigs

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Pig	813		1,540		
Price per tonne (Dressed Weight):					
Pig	9,000		10,000		
Macroeconomic Aggregates					
GO	7,317,000		15,400,000		110.5
IC	5,104,431	69.8	10,841,600	70.4	112.4
VA	2,212,569	30.2	4,558,400	29.6	106.0
COE	470,091	6.4	985,600	6.4	109.7
CFC	184,068	2.5	277,200	1.8	50.6
OS	1,558,410	21.3	3,295,600	21.4	111.5

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of swine/pigs recorded a growth of 110.5 per cent compared to 2012. The growth was driven by increase in the price and quantity produced. A growth of 106.0 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

30. Sub-Class 01461: Raising and breeding of poultry

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Poultry	18,385		17,076		
Price per tonne :					
Poultry	7,000		7,000		
Less Cull Hens ($ value)	2,142,323		880,706		
Macroeconomic Aggregates					
GO	126,552,677		118,651,294		-6.2
IC	93,020,178	73.5	84,361,070	71.1	-9.3
VA	33,532,499	26.5	34,290,224	28.9	2.3
COE	11,908,010	9.4	10,678,617	9.0	-10.3
CFC	7,617,105	6.0	7,000,426	5.9	-8.1
OS	14,007,384	11.1	16,611,181	14.0	18.6

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of poultry recorded a decline of 6.2 per cent compared to 2012. The growth was driven by decrease in the quantity produced and the value of cull hens. Where as an improvement of 2.3 per cent was noted in the value added of the commodity when compared to 2012. The decline in the intermediate cost contributed to this improvement.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

Note: Cull hen – Egg-laying hen; the primary activity of these hens is to lay eggs. After they finish laying eggs they are sold off. Whatever amount is received from their sales is taken as income from sale of cull hens under egg. A counter adjustment is made under poultry.

31. Sub-Class 01462: Production of eggs

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in Dozen:					
Egg	5,462,902		6,719,000		
Price per Dozen:					
Egg	4.0		3.8		
Add Cull Hens ($ value)	2,142,323		880,706		
Macroeconomic Aggregates					
GO	23,993,931		26,412,906		10.1
IC	19,125,037	79.7	20,628,480	78.1	7.9
VA	4,868,894	20.3	5,784,426	21.9	18.8
COE	1,594,967	6.6	1,848,903	7.0	15.9
CFC	1,995,320	8.3	2,377,162	9.0	19.1
OS	1,278,607	5.3	1,558,361	5.9	21.9

(Production and producer price of the commodity were sourced from Department of Agriculture)

The gross output of poultry recorded a growth of 10.1 per cent compared to 2012. The growth was driven by increase in the quantity produced. An improvement of 18.8 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of farmers by FBoS have been used to calculate the input ratios of this sub-class activity.

32. Sub-Class 01491: Bee-keeping

	2012	Aggregates Expressed as % of GO	2013	Aggregates Expressed as % of GO	Percentage Change
Production in tonnes:					
Honey	188		180		
Price per tonne:					
Honey	10,000		15,000		
Macroeconomic Aggregates					
GO	1,880,000		2,700,000		43.6
IC	492,730	26.2	793,800	29.4	61.1
VA	1,387,270	73.8	1,906,200	70.6	37.4
COE	253,042	13.5	342,900	12.7	35.5

(Production and producer price of the commodity were sourced from Department of Fisheries)

The gross output of freshwater aquaculture recorded a growth of 10.6 per cent compared to 2012. The growth was driven by increase in the quantity produced. An increase of 12.7 per cent was noted in the value added of the commodity when compared to 2012.

Data obtained through personal interviews of fishing companies by FBoS have been used to calculate the input ratios of this sub-class activity.

APPENDIX I

CONCEPTS AND DEFINITIONS

All concepts and definitions used in this report are based upon the recommendations of the United Nations. The major concepts and definitions and their treatment are briefly explained below.

Compensation of Employees Includes payments, whether in cash or in kind, made by the employer during the inquiry period for the work done to all persons included in the count of employees. It includes all cash payments, commissions, bonuses, cost of living allowances and wages paid during periods of vacation and sick leave, contributions in respect of their social security and pension and payments in kind.

Consumption of Fixed Capital In theory this is the value of the current replacement cost of fixed assets used up during the accounting period as a result of normal wear and tear. The consumption of fixed capital shown in this report is derived from the information supplied by the firm. This is expected to conform largely to the requirements of Income Tax Act.

Employees This includes all persons who work in the establishment and receive regular pay and persons working away from the establishment when paid by and under the control of the establishment, including persons on sick leave, holiday or vacation. Also included are salaried managers, and directors of incorporated businesses except when paid solely for their attendance at board of directors meetings. This category excludes working proprietors and unpaid family workers.

Establishment An establishment can be referred to as an enterprise that engages in one or predominantly one kind of economic activity, at or from one location, for which data are available or can be meaningfully compiled, that allow the calculation of the operating surplus.

Fixed Assets Fixed assets include the value of all physical assets expected to have a productive life of more than one year and intended for use by the establishment. Included are major additions, alterations and improvements to existing fixed assets that extend their normal economic life or raise their productivity.

Gross Fixed Capital Formation This is the outlay on new and second-hand durable goods less their sales plus their own account capital construction work done.

Gross Output This is the gross value of all goods and services produced during the accounting period, the value of own account capital construction and other income.

Intermediate Consumption Intermediate consumption consists of non-durable goods and services which have a lifetime of use of less than one year. Compensation of employees do not form part of intermediate consumption, but expenditure such as travelling expenses of management personnel are included. Intermediate consumption differs from total purchases of raw materials, fuels etc. by the amount of stock changes of such goods. Valuation of intermediate consumption is at purchasers' value i.e. it is inclusive of all costs incurred by producers in the acquisition of the required goods and services.

Operating This is the excess of value added by producers over compensation of employees,

Surplus consumption of fixed capital and net indirect taxes.

Payments in kind This is defined as the net cost to the employer of those goods and services furnished to employees free of charge or at markedly reduced cost that are clearly and primarily of benefit to the employees as consumers. The item includes food, beverages, clothing (except uniforms for civilians as these are not worn off-duty) and lodging etc.

Persons Engaged This is defined as the total number of persons who worked in or for the establishment during the reference period, including working proprietors, active business partners, unpaid family workers and regular paid workers.

Statistical Unit Statistical unit is the Unit for which information is collected.

Unpaid Family Workers Unpaid family workers are persons living in the household of any of the proprietors of the owning establishment and working in the establishment without regular pay for at least one third of the working time normal to the establishment.

Value Added Value added is the difference between the gross output and the intermediate consumption. It provides a useful way of measuring without duplication the economic importance of an industry or industrial sector.

Working Proprietors Working proprietors are owners of establishments who are actively engaged in the work of the establishment. Excluded are silent or inactive partners.

APPENDIX II

INDUSTRIAL CLASSIFICATION USED

SECTION A: AGRICULTURE, FORESTRY AND FISHING from the Fiji Standard Industrial Classification 2010, commonly known as FSIC 2010 has been used. FSIC 2010 is based on the International Standard Industrial Classification Rev. 4.

AGRICULTURE, FORESTRY AND FISHING includes the exploitation of vegetal and animal natural resources, comprising the activities of growing of crops, raising and breeding of animals, harvesting of timber and other plants, animals or animal products from a farm or their natural habitats.

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
01				**CROP AND ANIMAL PRODUCTION, HUNTING AND RELATED SERVICE ACTIVITIES** This division includes two basic activities, namely the production of crop products and production of animal products, covering also the forms of organic agriculture, the growing of genetically modified crops and the raising of genetically modified animals. It also includes service activities incidental to agriculture, as well as hunting, trapping and related activities. Group 015 (Mixed farming) breaks with the usual principles for identifying main activity. It accepts that many agricultural holdings have reasonably balanced crop and animal production and that it would be arbitrary to classify them in one category or the other. Agricultural activities exclude any subsequent processing of the agricultural products (classified under division 10 for manufacture of food products; 11 for manufacture of beverages and 12 for manufacture of tobacco products), beyond that needed to prepare them for the primary markets. However, the preparation of products for the primary markets e.g. drying of tobacco leaves is included here. The division excludes field construction (e.g. agricultural land terracing, drainage, preparing rice paddies etc.) classified in section F (Construction) and buyers and cooperative associations engaged in the marketing of farm products classified in section G.
	011			**Growing of non-perennial crops** This group includes the growing of non-perennial crops, i.e. plants that do not last for more than two growing seasons. Included is the growing of these plants for the purpose of seed production.

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
		0111	**01111**	**Growing of cereals (except rice) leguminous crops and oil seeds** This sub-class includes all forms of growing of cereals e.g. maize grains, leguminous crops e.g. beans and lentils and oil seeds e.g. groundnuts in open fields, including those considered organic farming and the growing of genetically modified crops. The growing of these crops is often combined within agricultural units. This sub-class excludes: -growing of maize for fodder, see 01191 -growing of edible nuts, see 01251
		0112	**01121**	**Growing of rice** This sub-class includes growing of rice (including organic farming and the growing of genetically modified rice)
		0113		**Growing of vegetables and melons, roots and tubers**
			01131	**Growing of taro** This sub-class includes growing of taro.
			01132	**Growing of cassava** This sub-class includes growing of cassava
			01133	**Growing of yam** This sub-class includes growing of yam
			01134	**Growing of kumala** This sub-class includes growing of kumala
			01139	**Growing of vegetables and melons, roots and tubers n.e.c.** This sub-class includes: -growing of leafy or stem vegetables such as cabbages, cauliflower, lettuce, spinach and other leafy or stem vegetables -growing of fruit bearing vegetables such as cucumbers, eggplants (aubergines), tomatoes and other melons and fruit-bearing vegetables -growing of root, bulb or tuberous vegetables such as carrots, turnips, garlic, onions (incl. shallots), other alliaceous vegetables and other root, bulb or tuberous vegetables -growing of mushrooms -growing of vegetable seeds -growing of other vegetables -growing of roots and tubers This sub-class excludes:

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				-growing of watermelons, see 01226 -growing of mushroom spawn, see 01301 -growing of chilies and peppers (capsicum) and other spices and aromatic crops, see 01289
		0114	**01141**	**Growing of sugar cane** This sub-class includes growing of sugar cane.
		0115	**01151**	**Growing and curing of tobacco** This sub-class includes growing of unmanufactured tobacco. Preliminary processing e.g. drying of tobacco leaves is included.
		0116	**01161**	**Growing of fibre crops** This sub-class includes growing of cotton or other vegetable textile fibres.
		0119	**01191**	**Growing of other non-perennial crops** This sub-class includes the growing of non-perennial crops n.e.c. such as -growing of fodder roots, clover, alfalfa, maize and other grasses, forage kale and similar forage products -growing of seeds of forage plants -growing of flowers, including production of cut flowers and flower buds -growing of flower seeds This sub-class excludes: -growing of sunflower seeds, see 01111 -growing of non-perennial spice, aromatic, drug and pharmaceutical crops, see 01289
	012			**Growing of perennial crops** This sub-group includes the growing of perennial crops, i.e. plants that lasts for more than two growing seasons, either dying back after each season or growing continuously. Included is the growing of these plants for the purpose of seed production.
		0112	**01121**	**Growing of grapes** This sub-class includes: -growing of wine grapes and table grapes in vineyards
		0122		**Growing of tropical and subtropical fruits**
			01221	**Growing of bananas** This sub-class includes growing of bananas

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			01222	**Growing of pineapples** This sub-class includes growing of pineapples
			01223	**Growing of mangoes** This sub-class includes growing of mangoes
			01224	**Growing of papayas** This sub-class includes growing of papayas
			01225	Growing of noni This sub-class includes growing of noni.
			01226	Growing of watermelon This sub-class includes growing of watermelon.
			01229	**Growing of tropical and subtropical fruits n.e.c.** This sub-class includes growing of tropical and subtropical fruits e.g. avocados and other tropical and subtropical fruits
		0123	**01231**	**Growing of citrus fruits** This sub-class includes growing of oranges and other citrus fruit.
		0125	**01251**	**Growing of other tree and bush fruits and nuts** This sub-class includes: -growing of berries: -growing of fruit seeds -growing of edible nuts e.g. peanuts -growing of other tree and bush fruits: This sub-class excludes: -growing of coconuts, see 01261
		0126	**01261**	**Growing of oleaginous fruits** This sub-class includes growing of oleaginous fruits e.g. coconuts and other oleaginous fruits This sub-class excludes: -growing of soya beans, groundnuts and other oil seeds, see 01111
		0127		**Growing of beverage crops**
			01271	**Growing of cocoa** This sub-class includes growing of cocoa

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			01272	**Growing of coffee** This sub-class includes growing of coffee
		0128		**Growing of spices, aromatic, drug and pharmaceutical crops**
			01281	**Growing of ginger** This sub-class includes growing of ginger.
			01282	**Growing of yaqona** This sub-class includes growing of yaqona.
			01283	**Growing of vanilla** This sub-class includes growing of vanilla
			01289	**Growing of spices, aromatic, drug and pharmaceutical crops n.e.c.** This sub-class includes: -growing of perennial and non-perennial spices and aromatic crops not elsewhere specified e.g. pepper (piper), chilies and peppers (capsicum) and other spices and aromatic crops -growing of drug and narcotic crops -growing of plants used primarily in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes
		0129	**01299**	**Growing of other perennial crops** This sub-class includes growing of vegetable materials of a kind used primarily for plaiting
		0130	**01301**	**Plant propagation** This sub-class includes the production of all vegetative planting materials including cuttings, suckers and seedlings for direct plant propagation or to create plant grafting stock into which selected scion is grafted for eventual planting to produce crops e.g. growing of plants for planting; growing of plants for ornamental purposes, including turf for transplanting; growing of live plants for bulbs, tubers and roots; cuttings and slips; mushroom spawn; operation of tree nurseries, except forest tree nurseries This sub-class excludes: -growing of plants for the purpose of seed production, see groups 011 and 012 -operation of forest tree nurseries, see class 0210

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
	014			**Animal production** This group includes raising (farming) and breeding of all animals, except aquatic animals. This group excludes: -breeding support services, such as stud services, see 01619 -farm animal boarding and care, see 01619 -production of hides and skins from slaughterhouses, see 10102
		0141		**Raising of cattle and buffaloes**
			01411	**Raising and breeding of cattle and buffaloes** This sub-class includes raising and breeding of cattle and buffaloes This sub-class excludes: -production of raw milk, see 01412
			01412	**Production of raw cow milk from cows or buffaloes** This sub-class includes production of raw cow milk from cows or buffaloes This sub-class excludes: -processing of milk, see 10501
		0142	**01421**	**Raising of horses and other equines** This sub-class includes raising and breeding of horses (including racing horses) This sub-class excludes: -operation of racing and riding stables, see 93199
		0144		**Raising of sheep and goats**
			01441	**Raising and breeding of sheep** This sub-class includes raising and breeding of sheep This sub-class excludes: -sheep shearing on a fee or contract basis, see 01619 -production of pulled wool, see 10102
			01442	**Raising of goats** This sub-class includes raising and breeding of goats

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
		0145	**01451**	**Raising of swine/pigs** This sub-class includes raising and breeding of swine (pigs)
		0146		**Raising of poultry**
			01461	**Raising and breeding of poultry** This sub-class includes fowls of the species Gallus domesticus (chickens and capons), ducks, geese, turkeys and guinea fowls This sub-class excludes: -production of feathers or down, see 10101
			01462	**Production of eggs** This sub-class includes -poultry farming for production of eggs -operation of poultry hatcheries
		0149		**Raising of other animals**
			01491	**Bee-keeping** This sub-class includes the production of honey.
			01492	**Other animal farming; production of animal products n.e.c.** This sub-class includes raising of live animals and production of animal products n.e.c.
		0150	01501	**Mixed farming** This sub-class includes the combined production of crops and animals without a specialized production of crops or animals. The size of the overall farming operation is not a determining factor. If either production of crops or animals in a given unit exceeds 66 per cent or more of standard gross margins, the combined activity should not be included here, but allocated to crop or animal farming. This sub-class excludes: -mixed crop farming, see groups 011 and 012 -mixed animal farming, see group 014
	016	**0161**	01619	**Support activities to agriculture and post-harvest crop activities** This sub-class includes: -support activities for crop production -agricultural activities on a fee or contract basis e.g. preparation of fields, establishing a crop, treatment of crops, crop spraying, including by air, trimming of fruit

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				trees and vines, transplanting of rice, thinning of beets, harvesting and pest control (including rabbits) in connection with agriculture -operation of agricultural irrigation equipment -provision of agricultural machinery with operators and crew -maintenance of land to keep it in good condition for agricultural use -support activities for animal production -agricultural activities on a fee or contract basis e.g. activities to promote propagation, growth and output of animals, herd testing services, droving services, poultry caponizing, coop, cleaning etc., activities related to artificial insemination, stud services, sheep shearing, farm animal boarding and care -activities of farriers -post-harvest crop activities -preparation of crops for primary markets, i.e. cleaning, trimming, grading, disinfecting -cotton ginning -preparation of tobacco leaves -preparation of cocoa beans -waxing of fruit -sun-drying of fruit and vegetables -seed processing for propagation -all post-harvest activities aimed at improving the propagation quality of seed through the removal of non-seed materials, undersized, mechanically or insect damaged and immature seeds as well as removing the seed moisture to a safe level for seed storage. This activity includes the drying, cleaning, grading and treating of seeds until they are marketed. The treatment of genetically modified seeds is included here. This sub-class excludes: -activities of agronomists and agricultural economists, see 74909 -landscape gardening, planting, see 81301 -maintenance of land to keep it in good ecological condition, see 81301 -organization of agricultural shows and fairs, see 82301 -activities of farriers -veterinary activities, see 75001 -vaccination of animals, see 75001 -renting of animals (e.g. herds), see 77301 -pet boarding, see 96099 -preserving of fruit and vegetables, including dehydration by artificial means, see 10301 -stemming and redrying of tobacco, see 12001

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
	017	**0170**	01701	**Hunting, trapping and related service activities** This sub-class includes: -hunting and trapping on a commercial basis -taking of animals (dead or alive) for food, fur, skin, or for use in research, in zoos or as pets -production of fur skins, reptile or bird skins from hunting or trapping activities This sub-class excludes: -hunting for sport or recreation and related service activities, see 93199
02				**FORESTRY AND LOGGING** This division includes the production of round wood for the forest-based manufacturing industries as well as the extraction and gathering of wild growing non-wood forest products. Besides the production of timber, forestry activities result in products that undergo little processing, such as fire wood, charcoal, wood chips and round wood used in an unprocessed form (e.g. pit-props, pulpwood etc.). These activities can be carried out in natural or planted forests.
	021	**0210**		**Silviculture and other forestry activities** This group includes the growing of standing timber: planting, replanting, transplanting, thinning and conserving of forests and timber tracts; growing of coppice, pulpwood and fire wood and operation of forest tree nurseries
			02101	**Native Forest** This sub-class includes growing of standing timber and operation of native forest tree nurseries. This sub-class excludes: -operation of tree nurseries, see 01301 -gathering of wild growing non-wood forest products, see 02301 -production of wood chips and particles, see 16101
			02102	**Pine** This sub-class includes growing of standing timber operation of pine tree nurseries. This sub-class excludes: -operation of tree nurseries, see 01301 -gathering of wild growing non-wood forest products, see 02301 -production of wood chips and particles, see 16101

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			02103	**Mahogany** This sub-class includes growing of standing timber and operation of mahogany tree nurseries. This sub-class excludes: -operation of tree nurseries, see 01301 -gathering of wild growing non-wood forest products, see 02301 -production of wood chips and particles, see 16101
	022	**0220**	**02201**	**Logging** This sub-class includes: -production of round wood for forest-based manufacturing industries -production of round wood used in an unprocessed form such as pit-props, fence posts and utility poles -gathering and production of fire wood -production of charcoal in the forest (using traditional methods) The output of this activity can take the form of logs, chips or fire wood. This sub-class excludes: -growing of standing timber: planting, replanting, transplanting, thinning and conserving of forests and timber tracts, see class 0210 -gathering of wild growing non-wood forest products, see 02301 -production of wood chips and particles, not associated with logging, see 16101
	023	**0230**	**02301**	**Gathering of non-wood forest products** This sub-class includes the gathering of non-wood forest products and other plants growing in the wild e.g. nuts, lac and resins, mushrooms, truffles, berries, balata and other rubber-like gums, cork, balsams, vegetable hair, eelgrass, acorns, horse chestnuts, mosses and lichens This sub-class excludes: -growing of mushrooms or truffles, see 01139 -growing of berries or nuts, see 01251 -gathering of fire wood, see 02201
	024	**0240**	**02401**	**Support services to forestry** This sub-class includes -forestry service activities: -forestry inventories -forest management consulting services -timber evaluation -forest fire fighting and protection -forest pest control

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
				-logging service activities: -transport of logs within the forest This sub-class excludes: -operation of forest tree nurseries, see class 0210
03				**FISHING AND AQUACULTURE** This division includes capture fishery and aquaculture, covering the use of fishery resources from marine, brackish or freshwater environments, with the goal of capturing or gathering fish, crustaceans, molluscs and other marine organisms and products (e.g. aquatic plants, pearls, sponges etc). Also included are activities that are normally integrated in the process of production for own account (e.g. seeding oysters for pearl production).
	031			**Fishing** This group includes capture fishery, i.e. the hunting, collecting and gathering activities directed at removing or collecting live wild aquatic organisms (predominantly fish, molluscs and crustaceans) including plants from the oceanic, coastal or inland waters for human consumption and other purposes by hand or more usually by various types of fishing gear such as nets, lines and stationary traps. Such activities can be conducted on the intertidal shoreline (e.g. collection of molluscs such as mussels and oysters) or shore based netting, or from home-made dugouts or more commonly using commercially made boats in inshore, coastal waters or offshore waters. Unlike in aquaculture (group 032), the aquatic resource being captured is usually common property resource irrespective of whether the harvest from this resource is undertaken with or without exploitation rights. Such activities also include fishing restocked water bodies.
		0311		**Marine fishing** This class includes activities of vessels engaged in fishing in ocean and coastal waters. This class excludes: -capturing of marine mammals see 01701 -processing of fish, crustaceans and molluscs on factory ships or in factories ashore, see10201 -fishing inspection, protection and patrol services, see 84231 -fishing practiced for sport or recreation and related services, see 93299 -operation of sport fishing preserves, see 93299

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			03111	**Marine fishing on a commercial basis** This sub-class includes fishing on a commercial basis in ocean and coastal waters.
			03112	**Taking of marine crustaceans and molluscs** This sub-class includes taking of marine crabs, prawns, etc in ocean and coastal waters.
			03113	**Taking of marine aquatic animals: turtles, sea squirts, tunicates, sea urchins etc** This sub-class includes turtle hunting, fishing for octopus etc in ocean and coastal waters.
			03114	**Beach-de-mer diving** This sub-class includes bech-de-mer diving in ocean and coastal waters.
			03115	**Gathering of other marine organisms and materials** This sub-class includes gathering of other marine organisms and materials: natural pearls, sponges, coral and algae in ocean and coastal waters.
		0312		**Freshwater fishing** This class includes fishing in inland waters. This class excludes: -fishing inspection, protection and patrol services, see 84231 -fishing practiced for sport or recreation and related services, see 93299 -operation of sport fishing preserves, see 93299
			03121	**Freshwater fishing on a commercial basis** This sub-class includes fishing on a commercial basis in inland waters.
			03122	**Taking of freshwater crustaceans and molluscs** This sub-class includes taking of freshwater crabs, prawns, kai etc in inland waters
			03123	**Taking of freshwater aquatic animals** This sub-class includes taking of freshwater aquatic animals in inland waters

DIVISION	GROUP	CLASS	SUB-CLASS	DESCRIPTION
			03124	**Gathering of freshwater materials** This sub-class includes gathering of freshwater organisms and materials: pearls, etc in inland waters
	032			**Aquaculture** This group includes aquaculture (or aqua farming), i.e. the production process involving the culturing or farming (including harvesting) of aquatic organisms (fish, molluscs, Crustaceans, plants, etc) using techniques designed to increase the production of the organisms in question beyond the natural capacity of the environment (for example regular stocking, feeding and protection from predators). Culturing/farming refers to the rearing up to their juvenile and/or adult phase under captive conditions of the above organisms. In addition, aquaculture also encompasses individual, corporate or state ownership of the individual organisms throughout the rearing or culture stage, up to and including harvesting.
		0321	**03211**	**Marine aquaculture** This sub-class includes: -fish farming in sea water including farming of marine ornamental fish -production of bivalve spat (oyster mussel etc.), lobster lings, shrimp post-larvae, fish fry and fingerlings -growing of laver and other edible seaweeds -culture of crustaceans, bivalves, other molluscs and other aquatic animals in sea water -aquaculture activities in brackish waters -aquaculture activities in salt water filled tanks or reservoirs -operation of fish hatcheries (marine) -operation of marine worm farms This sub-class excludes: -operation of sport fishing preserves, see 93299
		0322	**03222**	**Freshwater aquaculture** This sub-class includes: -fish farming in freshwater including farming of freshwater ornamental fish -culture of freshwater crustaceans, bivalves, other molluscs and other aquatic animals -operation of fish hatcheries (freshwater)

CONFIDENTIAL

2013 AGRICULTURE, FORESTRY AND FISHING CASE STUDY

Please specify the name and address.

Dear Sir\Madam,

PURPOSE: The study provides an important means of assessing the contribution this sector makes to the economy of Fiji, and indicates the changing composition and structure of the industry. The results of the Study are used by the Fiji Bureau of Statistics in the estimation of the Gross Domestic Product / National Income of Fiji and in the provision of other key indicators.

REFERENCE PERIOD: Reference period is the calendar year 2013. If your accounting year is different provide information approximating closest to the calendar year 2013.

COMPULSORY REQUIREMENT: The Study is conducted under the provisions of the Statistics Act 1961(Cap 71). In accordance with Section 8 subsection 2 of this Act you are required to provide the correct data during the interview. Failure to provide data could result in legal action without further notice.

CONFIDENTIALITY OF INFORMATION: Information supplied will be used by the department solely for the preparation of national statistics. Any release of information will be in accordance with the Statistics Act, which prohibits the release of data in a manner that identifies individual establishments or enterprises.

HELP AVAILABLE: Please contact Mr. Antonio Sokomuri on Extension 132 or email: asokomuri@statsfiji.gov.fj

Epeli Waqavonovono
Government Statistician

QUESTIONNAIRE

All relevant questions – QUESTIONS THAT ARE RELEVANT TO YOUR OPERATIONS – must be answered with clear and correct figures. Estimates will be accepted where actual data are not available. Values are to be expressed in **Fiji dollars**. **Note**: Farm gate price is to be included.

A PARTICULARS OF THE ESTABLISHMENT

NAME OF ORGANISATION:

LOCATION ADDRESS:

1. **NATURE OF WORK** : Please give a brief description of the main activity and any other substantial activity of the establishment covered by this return :

Main activity :

Other activity :

2. EMPLOYMENT	**NUMBER EMPLOYED**
a) Operatives (wage earners)	
b) Other (salary earners)	
c) Working proprieties	
d) Unpaid family workers	
Total	

B OUTPUT

3. VALUE OF PRODUCTION DURING THE ACCOUNTING YEAR

a)	DESCRIPTION OF PRODUCT	QUANTITY PRODUCED (TONNES)	PRICE PAID TO GROWERS ($/TONNE)	TOTAL VALUE ($)
		A	B	A*B
	TOTAL			
b)	Value of goods used for own consumption ($)			

4.	**OTHER INCOME EARNED DURING THE YEAR**	**VALUE ($)**
a)	Minor repairs & maintenance to plant, machinery, transport, buildings etc.	
b)	Value of own account capital construction work done	
c)	Rental income received for the hire of building; plant machinery transport etc.	
d)	Insurance claim received	
e)	Interest received	
f)	Gain on sale of fixed assets	
g)	Others (specify)	
	Total	

5.	**TOTAL INCOME DERIVED DURING THE YEAR** (QUESTIONS 3 AND 4)	$

C INPUT

6. PURCHASE OF MATERIALS DURING THE YEAR		**VALUE ($)**
	E.g. For crops:	
	a) Seeds	
	b) Fertilizer	
	c) Chemicals	
	d) Weedicides	
	For livestock and poultry :	
	a) Feeds	
	TOTAL	

7. OPERATING EXPENDITURE DURING THE YEAR		**VALUE ($)**
a)	Cost of fuel e.g. petrol, automotive and industrial diesel oil, LPG, Kerosene etc	
b)	Cost of electricity and water	
c)	Cost of minor repairs & maintenance paid for on vehicles, buildings, machinery etc.	
d)	Cost of transport expenses paid for on carriage and haulage and business travel	
e)	Value of contract and commission work done	
f)	Rental income paid for the hire of building; plant, machinery; transport etc.	
g)	Bad & doubtful debts written off, business licenses & interest paid; loss on sale of assets	
h)	Insurance paid	
i)	Depreciation	
j)	Others (specify)	
	TOTAL	

8. COMPENSATION OF EMPLOYEES		GROSS WAGES AND SALARIES (2)	EMPLOYERS CONTRIBUTION TO FNPF (3)	PAYMENT IN KIND (4)
		VALUE ($)		
a)	Operatives			
b)	Others			
	Total			

9.GRAND TOTAL OF ALL EXPENDITURE INCURRED [QUESTIONS 6+7+8 (2), (3) AND (4)]	$

D STOCKS

10. MATERIALS, FUELSUPPLIES & COMPONENTS	OPENING (1)	CLOSING (2)	CHANGE (2) - (1) = (3)
	VALUE ($)		
TOTAL			

E NET EARNINGS

11.	**Net profit \ loss of your establishment \ enterprise** (Question (5+10 (3) – 9)	$

F FIXED CAPITAL ASSETS

12.		VALUE ($)						
			Purchase of new and second hand goods at cost					
	TYPE OF FIXED ASSETS	Opening book value (1)	Locally (2)	From abroad (3)	Own account Constr. (4)	Sale of capital Assets (5)	Depreciation (6)	Closing book value (7)
a)	Land							
b)	Land development & improvement							
c)	Buildings							
d)	Plant and Machinery							
e)	Furniture, fixtures and office equipment							
f)	Transport vehicle and related equipment							
g)	Others (specify) :							
	Eg. Planting of new trees to produce fruits							
	Purchase of cows and hens to produce milk & eggs respectively							
	Major constructions, reconstructions and extensions to existing fixed assets							
	TOTAL							

Signature of person completing the questionnaire: …… Date: ……

Name: ……..

Position: ……

Telephone No: ……. Fax No: ……..……..

THANK YOU FOR COMPLETING THE QUESTIONNAIRE

APPENDIX IV

PRIMARY PRODUCTION : SELECTED AGRICULTURAL PRODUCTS

Period	Sugar Cane [000 tonnes] [1]	Copra [tonnes	Paddy Rice [tonnes]	Virginia Tobacco [tonnes] [2]	Cocoa [tonnes] [7]	Beef [tonnes] [3]	Pork [tonnes] [3]	Goat [tonnes] [8]	Chicken [tonnes] [4]	Eggs [tonnes] [9]	Fish [tonnes] [5]	Ginger [tonnes [6]	Yaqona [tonnes]
1996	3,729	20,964	17,370	214	126	2,401	791	806	9,602	2,844	13,847	2,404	2,685

Notes:

[1] From 1996 figures relate to calendar year and not seasons, therefore may not necessarily tie in with sugarcane production data given elsewhere in this report.

[2] Does not include Virginia tobacco used for twist tobacco.

[3] For animals killed in slaughter houses only.

[4] Refers to the output of registered chicken abattoirs only and includes dressed chicken as well as sales of live chickens.

[5] Estimates of fish caught inside Fiji waters excluding 'subsistence'.

[6] Includes rejects, planting ginger rhizomes and diseased ones.

[7] Sales to NATCO

[8] Includes animals killed in slaughter houses.

[9] Data on eggs have been revised due to the new weight conversion from 636 grams per dozen to 694 grams per dozen.

2013	14,804	38	1,610	42.1	82.50	9.0	180	59	162	237,284	1,110

Notes:
[a] In 1998 bulk of the sugar was exported to the European Union markets which paid higher prices.
[b] Relates to calendar year.
[c] Relates to seasons.
