PREFACE

The report provides information on the Information and Communication industry in 2014. The information was gathered from establishments engaged in Information and Communication business. These include the production and distribution of information and cultural products, the provision of the means to transmit or distribute these products, communication, information technology activities and the processing of data and other information service activities. It excludes information on Information and Communication activities in the informal sector.

The important numbers presented are the macro-economic aggregates such as Gross Output, Intermediate Consumption, Value Added, Compensation of Employees, Consumption of Fixed Capital and Operating Surplus. These aggregates are combined with similar information on other industries to provide an estimate of GDP, which is a measure of our economy's size. Information made available in this report will allow us to work out the industry's contribution to the economy. Information contained in this report constitutes inputs to a national accounts system which basically provides a quantitative image of the whole economy.

Information on the Information and Communication industry would be useful to a good number of users, for instance the;

- 1) Economist who needs to analyze the supply and demand for such services.
- 2) Planner who uses the data to forecast the economy's performance.
- 3) Investor who wishes to have a closer look at the industry.

The cooperation of those businesses who supplied the information presented in this report is hereby acknowledged. The Bureau of Statistics will continue to seek their support as we need to continually provide reliable statistics for evidence based planning. I also would like to thank the staffs who were engaged in the conduct of the survey and the preparation of this report.

1 INTRODUCTION

1.1 History of Surveys undertaken

This report contains the results of the survey carried out for the Information and Communication industry for 2014 (refer 2.2 on Coverage and Scope).

According to the published report titled “Survey of the Transport Industry 1973” the first survey on the communication industry was done for 1970. This report also contains estimated data on Gross Output and its components for 1968 and 1969, but the source of the data for these two years is not mentioned in the report. 1970 Survey was followed by surveys for 1971, 1972, 1973, 1976, 1981, 1990, 1995 and 2002.

The Communication survey started off as an annual inquiry but after 1973, it was discontinued. The survey was then conducted on an ad hoc basis until 2008 after which it became an annual exercise to meet the need of the Fiji Bureau of Statistics National Accountants in re-basing the constant price Gross Domestic Product (GDP) to a more recent year.

1.2 Need for statistics relating to Information and Communication

The Information and Communication industry accounts for a substantial proportion of the total economic activity, whether in terms of the sector to the GDP or in terms of its share of total employment and gross fixed capital formation. Statistics on the Information and Communication industry are therefore needed for the preparation of national accounts so that a meaningful study of the whole economy can be made. The data can also be used to construct the input-output table that shows the inter-connection of the Information and Communication industry with other industries. Policy makers too require the data for formulating sound economic and social policies that augment capital formation. In addition, the establishments engaged in the Information and Communication industry find the data helpful.

2 METHODOLOGY

2.1 Legal Basis

The Survey was conducted under the provisions of the Statistics Act (Cap 71). This Act stipulates the completion of the questionnaire, as well as protects the confidentiality of the information submitted by the establishments.

2.2 Coverage and Scope

The 2014 survey covered all establishments operating in the Information and Communication industry defined by the Fiji Standard Industrial Classification (FSIC) 2010 Section J. It is nevertheless possible that some small units may have been omitted due to difficulties in identifying them, but the nature of such units does not affect the overall results in any significant way.

The businesses in the Information and Communication industry include the production and distribution of information and culture products, the provision of the means to transmit or distribute these products, communications, information technology activities and the processing of data and other information service activities (refer Appendix II on Industrial Classification Used).

2.3 Statistical Unit

The unit of reporting was the establishment (refer Appendix I on Concepts and Definitions). In cases where firms operated more than one type of business, efforts were made to obtain accounts for each activity. Where this was not feasible, the firm was classified according to the type of activity that brought in the most revenue.

2.4 The Frame

The frame utilized to survey the establishments engaged in the Information and Communication industry in 2014 was the list of establishments maintained by the FBoS. This list is known as the Business Register (BR), which is kept updated on the basis of information supplied to the FBoS by the Fiji Revenue and Customs Authority (FRCA), Registrar of Companies and the City and Town Councils.

2.5 Questionnaire Design

The questionnaire specifically designed for the communication industry sought information on the particulars of the establishment e.g. type of organization; income; expenditure; stocks; assets and employment (refer Sample Questionnaire attached as appendix IV).

2.6 Data Collection and Survey Procedures

The questionnaires were posted on 30th June, 2015 and replies were required within a month. Response by the due date was low; therefore, personal visits to obtain the questionnaires were made to those establishments that did not respond within a month and to those establishments that required assistance in filling out the questionnaires.

Once the questionnaires were received in the office, scrutiny and editing of data contained in them followed. Errors and omissions if found, called for more correspondence, telephone calls or personal visits in an attempt to obtain complete and correctly filled up returns, which were then placed in files sorted by activity and passed on for data entry.

On completion of data entry, tables were run, data edited and analyzed and reports written.

2.7 Data Processing

FBoS' Information Technology Business Unit using Statistical Analysis System (SAS) software processed data.

2.8 Reference Period

The establishments contacted were to submit details for the calendar year 2014. Where the accounting year differed from the calendar year, establishments were asked to provide information for the accounting year that covered the major part of the calendar year 2014.

2.9 Response Rate

The Survey had a response rate of 88 per cent.

Establishments which operated during the whole or part of the survey reference period but became untraceable during the survey enumeration period due to closure or removal, were taken as non-respondents. To account for the operations of the non-responding establishments, data were rated-up.

2.10 Rate-up Factors

Data of non-responding establishments were calculated using rate-up factors. The rate-up factors were derived by first sorting out establishments into types of business and then grouping these establishments into 6 “number of persons engaged” size groups of 1-4; 5-9; 10-19; 20- 49; 50-99 and 100+. Using number of persons engaged in each of this group, simple arithmetic means of Value Added were obtained. These arithmetic means were then multiplied by number of persons engaged in each of the non-responding group to estimate their data.

The estimated figures for the non-responding units were then added to the figures of the responding units to arrive at the estimated data of the entire information and communication industry.

The Gross Fixed Capital Formation too has been estimated for non-response. Generally capital formations in small establishments, like the ones who have not responded in our inquiry, are low.

Empirically,

Let n_{ij} be the number of employees in group i of the j establishment of those sampled and let g_{ij} be its corresponding parameter; $i = 1$ to 6 ; $j = 1$ to s , where s is all sample. Then estimate,

$$\hat{G}_{(i)} = \frac{\sum_{i=1}^6 \sum_{j=1}^k g_{ij}}{\sum_{i=1}^6 \sum_{j=1}^k n_{ij}} \left(\sum_{i=1}^6 \sum_{j=1}^k n_{ij} + \sum_{i=1}^6 \sum_{j=k+1}^s n_{ij} \right)$$

where k = number responded

l = number not responded (which is $s-k$)

3 RESULTS

All data contained in this report are in Fiji Dollars and in current prices.

All tables in this report contain data inclusive of estimates for non-response; exceptions are tables 1A, 2 to 5B and 8 to 10 that contain actual survey data.

Results of some sub-classes have been grouped together in order to protect the confidentiality of the information supplied by them.

APPENDIX I

CONCEPTS AND DEFINITIONS

All concepts and definitions used in this report are based upon the recommendations of the United Nations. The major concepts and definitions and their treatment are briefly explained below.

<i>Compensation of Employees</i>	Includes payments, whether in cash or in kind, made by the employer during the inquiry period for the work done to all persons included in the count of employees. It includes all cash payments, commissions, bonuses, cost of living allowances and wages paid during periods of vacation and sick leave, contributions in respect of their employee's social security and pension and payments in kind.
<i>Consumption of Fixed Capital</i>	In theory this is the value of the current replacement cost of fixed assets used up during the accounting period as a result of normal wear and tear. The consumption of fixed capital shown in this report is derived from the information supplied by the firm. This is expected to conform largely to the requirements of Income Tax Act and no adjustment is attempted to bring this into conformity with the national accounts definition.
<i>Employment Size Group</i>	This includes paid employment as well as people engaged.
<i>Establishment</i>	An establishment is ideally an economic unit, which engages under single ownership or control, in one, or predominantly one kind of economic activity at a single physical location. An establishment may be part of an enterprise that is involved in more than one kind of economic activity at a single location. The organization and the record - keeping practices of such an enterprise maybe such that data in respect of the inputs and outputs of the different classes of activity cannot be readily compiled. An example of this problem can be seen in retailing activities, which are combined with running of hotels. In both cases if it is not possible to separate the input-output costs of each activity due to the difficulty in the enterprises accounting system, the activity that brings in the major portion of the income is used as the criterion for classifying such establishments. An establishment could have been a branch of another one, and particulars had to be provided for each such branch establishment whether it was in the same town or district or in a different area.
<i>Fixed Assets</i>	Fixed assets include the value of all physical assets expected to have a productive life of more than one year and intended for use by the establishment. Included are major additions, alterations and improvements to existing fixed assets that extend their normal economic life or raise their productivity.

<i>Gross Fixed Capital Formation</i>	This is the outlay on new and second-hand durable goods less their sales plus their own account capital construction work done on similar goods.
<i>Gross Output</i>	This is the gross value of all goods and services produced during the accounting period. Included here are the income received from fees and commission, the value of capital construction for own account and other income.
<i>Intermediate Consumption</i>	Intermediate consumption consists of non-durable goods and services, which have a lifetime of use of less than one year. Compensation of employees do not form part of intermediate consumption, but expenditure such as traveling expenses of management personnel are included. Intermediate consumption differs from total purchases of raw materials, fuels etc. by the amount of stock changes of such goods. Valuation of intermediate consumption is at purchasers' value i.e. it is inclusive of all costs incurred by producers in the acquisition of the required goods and services.
<i>Local Owned</i>	All companies with 51 per cent of its equity held in Fiji are considered locally owned.
<i>Number of Employees</i>	This includes all persons who work in the establishment and receive regular pay and persons working away from the establishment when paid by and under the control of the establishment. Also included are salaried managers, and directors of incorporated businesses except when paid solely for their attendance at board of directors meetings.
<i>Operating Surplus</i>	This is the excess of value added by producers over compensation of employees, consumption of fixed capital and net indirect taxes.
<i>Payments in kind</i>	This is defined as the net cost to the employer of those goods and services furnished to employees free of charge or at markedly reduced cost that are clearly and primarily of benefit to the employees as consumers. The item includes food, beverages, clothing (except uniforms for civilians as these are not worn off-duty) and lodging etc.
<i>Statistical Unit</i>	Statistical unit is the Unit for which information is collected.
<i>Unpaid Family Workers</i>	Unpaid family workers are persons living in the household of any of the proprietors of the owning establishment and working in the establishment without regular pay for at least one third of the working time normal to the establishment.
<i>Value Added</i>	Value added is the difference between the gross output and the intermediate consumption. It provides a useful way of measuring without duplication the economic importance of an industry or industrial sector.
<i>Working Proprietors</i>	Working proprietors are owners of establishments who are actively engaged in the work of the establishment. Excluded are silent or inactive partners.

EMPLOYMENT AND COMPENSATION OF EMPLOYEES

57 Please note that the information in respect of employment is for the last pay-week in June 2014 but the rest of the question requires data for the appropriate accounting year.

Gross wages and salaries includes overtime, sick and holiday pay, bonuses, payments under piece rate schemes, all allowances, severance and redundancy pay, sales commissions paid to own employees and directors fee etc.

Payment in kind is the cost to the employer for providing employees with housing, transport, clothing, food, drinks, fuels, etc free of charge or at a reduced rate.

Operatives includes all employees directly engaged in the activity of the establishment, eg those in fabrication, processing, assembling, shop messengers, warehouse men, packers and repair men etc. Casual workers should also be included here.

Others include administrators, technical and clerical personnel, eg salaried managers, clerks and typists etc.

Expatriates are non-Fiji citizens who stayed in Fiji.

Working proprietors include all individual proprietors and partners who are actively engaged in the work of the establishment. Silent or inactive partners should be excluded unless they participate actively in the work of the establishment.

Unpaid family workers include persons living in the household of any of the proprietors of the owning establishment and working in the establishment without regular pay for at least a third of the normal working hours of the establishment.
