1.0 INTRODUCTION

1.1 Overview

International Trade in Services relates to trade in services between Fiji, which is the resident country and non-resident countries. As such, the International Trade in Services Statistics (ITSS) provides information on Fiji's import and export of services. It is compiled quarterly and is supplemented by an annual compilation.

1.2 Purpose

The main reason for the Fiji Islands Bureau of Statistics (FIBOS) compiling the ITSS is to measure the imports and exports of services relating to:

- Communication - includes postal, courier, and telecommunications services.
- Computer and information - includes transactions related to hardware consultancy, software implementation, information services (data processing, data base, news agency), and maintenance and repair of computers and related equipment.
- Construction - includes work performed on construction projects and installations by employees of an enterprise in locations outside the economic territory of the enterprise.
- Financial - includes financial intermediary and auxiliary services except those of insurance enterprises and pension funds. Also includes commissions and fees for letters of credit, lines of credit, financial leasing, foreign exchange transactions, consumer and business credit services, brokerage services, underwriting services, arrangements for various forms of hedging instruments, etc. Auxiliary services include financial market operational and regulatory services, security custody services, etc.
- Government - includes expenditures of embassies, consulates, military units and defense agencies. Also included are transactions associated with the provision of joint military arrangements and peacekeeping forces, such as those of the United Nations.
- Insurance - includes services provided for freight insurance on goods exported and imported, services provided for other types of direct insurance including life and non-life, and services provided for reinsurance.
- Personal, cultural, and recreational - includes
 - audiovisual and related services and
 - other cultural services such as those associated with libraries, museums and other cultural and sporting activities.

- Other business - includes merchanting¹ and other trade-related services; operational leasing services; and miscellaneous business, professional, and technical services.
- Royalties and license fees – includes receipts and payments for
 - the authorized use of intangible non-produced, non-financial assets and proprietary rights such as trademarks, copyrights, patents, processes, techniques, designs, manufacturing rights, franchises, etc. and
 - the use, through licensing agreements, of produced originals or prototypes such as manuscripts, films, etc.
- Transportation - includes freight and passenger transportation by all modes of transportation and other distributive and auxiliary services including rentals of transportation equipment with crew.
- Travel - includes services related to business and personal travel acquired from an economy by travelers during visits of less than one year in that economy. Students and medical patients are treated as travelers, regardless of the length of stay. It excludes international passenger services, which are included in *transportation*. Military and embassy personnel and non-resident workers are not regarded as travelers. However, expenditures by non-resident workers are included in *travel*, while those of military and embassy personnel are included in *government services*.

1.3 Need for International Trade in Services Statistics

There is wide demand for ITSS. The major users are the FIBOS, the Reserve Bank of Fiji (RBF), the Government of Fiji and the International Monetary Fund (IMF). ITSS is used for:

1.3.1 Compilation of official statistics

Other than being released on it's own as a press release (refer 3.1), the ITSS is used for compiling the services component of the current account in the Balance of Payments Statistics (BOP) (refer 3.2).

1.3.2 Market Research

The data are used as an indicator to gauge the types of services that are more in demand, thus the ITSS is useful for businesses.

1.3.3 General Economic Research

ITSS is also used in economic forecasting, econometric modelling, academic research, and media articles on economic developments.

¹ Refers to the purchase of goods by a resident (of the compiling economy) from a non-resident and the subsequent resale of the goods to another non-resident; during the process, the goods do not enter or leave the compiling economy. It includes transactions on ships, aircraft, and auction sales as well.

2.0 METHODOLOGY

ITSS are compiled in accordance with the latest international standards in the IMF's BOP manual, 5th edition.

Getting hold of timely and accurate data on International Trade in Services at times prove difficult, more so when information is sort on a quarterly basis instead of annually, in which case data can easily be extracted from the audited accounts and also when the source of the data is more than one. How data are sourced from different sources and put together are discussed below:

2.1 Survey of International Trade in Services

Most of the data for the compilation of the ITSS is sourced from the Survey of International Trade in Services (SITS), which is a mail enquiry, conducted and published every quarter and also annually.

2.1.1 Legal Basis

The SITS is conducted under the provisions of the Statistics Act 1961 (Cap 71). This Act protects the confidentiality of the information submitted to FIBOS by the enterprises and stipulates the completion of the questionnaire as well.

2.1.2 Scope and Coverage

The SITS covers those enterprises operating in the Fiji economy that engage in trade in services, be it a government institution, financial or trading enterprise, non-profit body or an individual. It is nevertheless possible that some small units not employing regular paid workers may have been omitted due to difficulties in identifying them, but the nature of such units do not affect the overall results in any significant way.

2.1.3 Classification

The enterprises surveyed in the SITS are classified according to the Fiji Standard Industrial Classification (FSIC) 2004 which classifies businesses by the type of activity they engage in. The FSIC 2004 is based on the United Nations International Standard Industrial Classification Rev 3.

2.1.4 Statistical Unit

The unit of reporting is the enterprise.

2.1.5 Frame

The frame used for surveying the businesses engaged in international trade in services activity is a list of businesses maintained by the FIBOS. This list is known as the SIT Company Listing (SITCL) which is sourced from the Business Register (BR), FIBOS' mainframe list of all registered/licensed businesses operating in Fiji. FIBOS keeps the BR, and as a consequence the SITCL, updated (refer 2.1.5.1 for exception) on the basis of information supplied by the Fiji Trade and Investment Board (FTIB), Registrar of Companies, Fiji Islands Revenue and Customs Authority, Fiji National Provident Fund and the City and Town Councils.

2.1.5.1 Introducing New Companies to the SITCL

SITS personnel liaise with FTIB on a regular basis to get a list of new businesses entering into operation. The companies in the list are then sent exploratory surveys (refer Appendix I) which gathers information on the size and nature of the business and most importantly whether it engages in any form of international trade in services activity. Short-listed companies are then added to the SIICL, and eventually the BR.

2.1.6 Questionnaire Design

Enterprises engaged in the following nine different types of activities as per the FSIC 2004 sub-classes are surveyed in the SITS:

1. Information technology services and royalties – captures receipt and payments of computer hardware and software consultancy and implementation services, data processing services, database services, news agency and subscription services, license fees, distribution fees (including royalties) on computer software, license fees, royalties, copyright and patent fees, etc on computer design and hardware, other computer and information services and other transaction in services and royalties
2. Audio visual royalties and services - captures the receipts and payments of cinema, television, video, multimedia and other transactions in services and royalties such as professional services, management fees between affiliated companies, financial services, insurance services, rental or operational leasing services other than for ships or aircrafts, research and development services, trade related services, technical services, communication services, personal cultural and recreational services, royalties, distribution, franchise, copyright, license and patent fees, and trademarks, etc and other services
3. Resident producers of Air Transport services - captures receipts of international air freight (carried on international and domestic routes) discharged in Fiji from

abroad, loaded in Fiji for abroad, carried between foreign airports, carriage of mail on behalf of foreign postal authorities, earnings received from other airlines in respect of international airline tickets sold abroad for the carriage of persons within Fiji, international passenger fares sold in Fiji and abroad, earnings from chartering and operational leasing of this business aircraft to non-residents, other earnings from non-residents for air transport related services provided abroad and transactions in other services and royalties. Payments include fuel taken on at overseas airports, expenses incurred for catering and operational leasing of aircraft form non-residents, aviation navigation and landing charges incurred overseas, advertising and promotional expenses incurred overseas, agency fees and promotional expenses incurred overseas, stores purchased overseas, office and administrative expenses incurred overseas, crew layover expenses (accommodation, meals, etc), aircraft repairs expenses incurred overseas, other expenses incurred overseas for air transport related services and transactions in other services and royalties

4. Non-resident producers of Air Transport services – captures receipts of air navigation and handling charges, agency fees and commission, advertising and promotional, office and administration, crew layover (accommodation, meals etc) other transportation expenses incurred in Fiji, and other expenses incurred in Fiji. Payments include gross passenger fares, earnings from carriage of mail on behalf of Fijian postal authorities, and earnings from non-transportation services provided to Fijian residents
5. Non-resident producers of Sea Transport services – captures receipts of stevedoring, masters’ cash, repairs to vessels and containers, other disbursements in Fiji on behalf of non-resident shipping owners/operators for sea transport related services, agency fees and commission receipts and other services provided by this business to non-residents. Payments include passenger fares sold in Fiji, other earnings in Fiji by non-resident shipping operators and other services received by this business from non-residents
6. Telecommunication services - capture receipts and payments of telephone services, satellite telecommunications services, cable maintenance services, other telecommunication services and other transaction in services and royalties. Also other information on sales to non-residents and purchase from non residents is also recorded
7. Postal services - captures receipts and payments of postal services, courier services and other transactions in services and royalties
8. Education services – captures the receipts and payments of educational consultancy services, correspondence courses, royalties and license fees on educational services, education services provided through registered educational institutes, other educational services and other transactions in services and royalties

9. Transactions of residents with non-residents in services and royalties – this is a standard form sent to enterprises, excluding those enterprises mainly engaged in activities mentioned from 1-8 that are sent specific questionnaires. It captures the receipts and payments of:
- professional services, which includes services such as:
 - legal,
 - accounting and auditing,
 - advertising market research and public opinion polling,
 - management consultancy and public relations, and
 - other professional services;
 - management fees between affiliated companies;
 - financial services;
 - insurance services (own asset risk placed directly abroad);
 - rental or operational leasing services other than for ships or aircraft;
 - research and development services;
 - trade related services (commission, agents fees, etc);
 - technical services, which includes:
 - engineering,
 - architectural,
 - surveying, and
 - other technical services;
 - computer and information services, which includes:
 - computer hardware and software consultancy and implementation,
 - data processing,
 - database,
 - news agency and subscription,
 - license fees, distribution fees (including royalties) on computer software,
 - royalties, copyright and patent fees etc. on computer design and hardware, and
 - other computer and information;
 - royalties; distribution, franchise, copy right, license and patent fees, and trademarks, etc (excluding computer software, design and hardware)
 - patents, industrial designs, industrial know how, manufacturing rights and prototypes;
 - trademarks and franchising fees;
 - films, TV programs, video, and multimedia;
 - music;
 - communication services, which includes
 - postal,
 - courier,
 - telecommunications, and
 - other communications;
 - construction services;
 - personal, cultural and recreational services, which includes:

- education,
- health and social,
- sporting and entertainment, and
- other personal, cultural and recreational services;
- agriculture, mining & on-site processing services, which includes:
 - agriculture,
 - mining,
 - waste treatment, de-pollution,
 - trademarks, franchising fees, and
 - other professional services;
- other services, which includes:
 - manufacturing, and
 - other services not elsewhere included.

The questionnaire also includes questions on merchanting and other sales to non-residents and purchases from non-residents.

2.1.7 Data Collection and Survey Procedures

The questionnaires together with pre-paid envelopes are posted a week after the end of the quarter being surveyed. Replies are required within 30 days. Response by the due date is generally low to medium; therefore a reminder is issued allowing further 7 days to respond. A minimum response rate of 80 per cent is required for publication each quarter. Telephone calls are made to follow-up companies, which do not respond after being reminded. In extreme cases, personal visits to obtain the questionnaires are made to those companies that do not respond in spite of the telephone calls and to those companies that require assistance in filling out the questionnaire. The visits are usually done over a two-week period. One week is set aside for visiting companies in the Western Division while the other week concentrates getting responses from companies in the Central area.

2.1.8 Data Verification

Once the questionnaires are received in the office, scrutiny and editing of the data contained in them follows. Errors and omissions if found, calls for more correspondence, telephone calls or personal visits in an attempt to obtain complete and correctly filled up returns which are then placed in files sorted by activity and passed on for data entry.

2.1.9 Data Processing

Survey data is entered into a pre-set Data Entry Microsoft Excel spreadsheet. The Data Entry sheet is designed such that each section of the survey form corresponds exactly with the format of the Data Entry sheet.

SITS compilation guidelines require these companies to be divided into various categories such as postal services, resident airline, telecommunication, non-resident airline, education, non-resident sea, audiovisual, and information technology as defined by the FSIC 2004. The totals for each group and sub-groups are automatically calculated in tables at the bottom of each respective spreadsheet.

The Data Entry sheet contains names of all companies in the SITSCL/BR and new companies can easily be inserted.

2.1.10 Reference Period

The companies contacted are requested to submit details for the quarter. There are four quarters in a year: Quarter 1 ended 31st March, Quarter 2 ended 30th June, Quarter 3 ended 30th September and Quarter 4 ended 31st December.

2.1.11 Non-Responding Companies

Of the total companies surveyed, SITS data is not published unless the minimum 80 per cent response requirement is fulfilled. Response from all significant companies with sizeable turnover is ensured.

2.1.12 Non-Response Rate Up

Data for non-responding companies are not rated-up because not all companies engage in regular export and import of services every quarter. However checks are made to see, for example, that if the enterprise that has not responded in a survey quarter had a major transaction in the previous quarter to ensure that if there was a spill over of the activity in the survey quarter gets covered.

2.2 Ministry of Finance

The Ministry of Finance provides monthly data on receipts and payments of peacekeeping forces which are recorded under Government services. Actual data received are verified and posted directly to the trade in services worksheets.

2.3 Overseas Exchange Transactions

OET records transactions that involve the exchange of Fijian dollars for foreign currency and vice versa. The schedules showing the OET transaction are received every month from the Reserve Bank of Fiji.

Services items sourced from OET are:

- Sea Transport – freight and others;
- Travel – education² related;

² Used for checking the data sourced from the SITS

- Travel – business and personal services;
- Other Services – agricultural, mining, on site processing, audio visual and related services and
- Government Services – embassy and international organizations expenditure.

OET data once received are verified and posted directly to the trade in services worksheets.

2.4 Other sources

A data model is used for measuring Travel Credits every quarter:

Total Expenditure = Per diem³* number of visitors * average length of stay

The Total Expenditure is categorized by Business and Personal Travel and then posted to the trade in services worksheet under Travel.

The data that feeds into the data model are sourced thus:

- Expenditure by visitors this gives the per diem and is based on the International Visitor Survey (IVS) which is conducted annually by the Ministry of Tourism. The survey collects expenditure eg accommodation, transport etc made by visitors. The mode of the survey is personal interview and takes place at the International Airport(s) in Fiji. In the absence of actual data, the last actual per diem is inflated:

Current per diem = Last actual per diem available * price index

- Price index is compiled using prices of commodities sold to visitors at hotels. The data are sourced from the Tourist Expenditure Survey of hotels conducted by the BOP Business Unit of FIBOS.
- Average length of stay is sourced from the Immigration Department.

3.0 RESULTS

Data from the different sources i.e. SITS, Tourism Earnings, the RBF and the Ministry of Finance & National Planning are used for to compile the ITSS which are then released as a Press Release on its own and also forms the services component of the BOP:

3.1 ITSS Press Release

Refer Table 3.1 for the table that gets released with commentary on the movements in different services from one period to the other and the reasons for those movements.

- Imports and exports of goods;
 - Remitted profits, interest or dividends;
 - Transportation (e.g. airfares) and travel (e.g. hotels and meals) transactions;
 - Services in regard to overseas projects that are subcontracted from Fijian residents. For example architectural services subcontracted to this business by a Fijian construction company in regard to erecting a building overseas will be reported by that company and need not be reported by this business as the sub-contractor;
 - Services provided on location abroad for 12 months or more. For example, if this business has a subsidiary abroad or establishes an office to undertake a construction project abroad over the long term, the services provided by that office to an overseas client should not be reported. However, services that this business' Fijian operations might supply to that overseas office should be reported.
